PR: Practical OR: Oral TUT: Tutorial

Note: Students of T.E. (Electronics & Telecommunications) have to opt any one of the audit course from the list of audit courses prescribed by BoS (Electronics & Telecommunications Engineering)

Elective -II

- 1) Digital Image Processing
- 2) Sensors in Automation
- 3) Advanced JAVA Programming
- 4) Embedded Processors
- 5) Network Security

SEMESTER - V

Third Year of E & Tc Engineering (2019 Course)

304181: Digital Communication

| Teaching Scheme: | Credit | Examination Scheme: |
|----------------------|--------|----------------------------|
| Theory: 03 hrs./week | 03 | In-Sem (Theory): 30 Marks |
| | | End Sem (Theory): 70 Marks |

Prerequisite Courses, if any:

- 1. Principles of Communication Systems
- 2. Signals & Systems
- 3. Control Systems
- 4. Digital Circuits
- 5. Electronic Circuits.

Companion Course, if any: Digital Communication Lab

Course Objectives: To make the students understand

- To familiarize students with various digital modulation techniques used in digital communication systems.
- To equip students the students with tools required for performance analysis of digital communication systems.
- To introduce the students with the concept of information theory & coding techniques.

Course Outcomes: On completion of the course, learner will be able to -

CO1: Apply the statistical theory for describing various signals in a communication system.

CO2: Understand and explain various digital modulation techniques used in digital communication systems and analyze their performance in presence of AWGN noise.

CO3: Describe and analyze the digital communication system with spread spectrum modulation.

CO4: Analyze a communication system using information theoretic approach.

CO5: Use error control coding techniques to improve performance of a digital communication system.

| | Course Contents | | | | | | | | |
|----------------------------------------------|-------------------------------------------------------------------------------|-------------------|--|--|--|--|--|--|--|
| Unit I | Random Processes & Noise | (07 Hrs.) | | | | | | | |
| Random Processes: Intr | oduction, Mathematical definition of a random process, Stationary | processes, Mea | | | | | | | |
| Correlation and Covarianc | e function, Ergodic processes, Transmission of a random process the | rough a LTI filte | | | | | | | |
| Power spectral density. | | | | | | | | | |
| Mathematical Represent | ation of Noise: Some Sources of Noise, Frequency-domain Represe | entation of Nois | | | | | | | |
| Superposition of Noises, L | inear Filtering of Noise, Quadrature Components of Noise, Represe | entation of Noi | | | | | | | |
| using Orthonormal Coordi | nates. | | | | | | | | |
| Mapping of Course | CO1: Apply the statistical theory for describing various signal | ls in a | | | | | | | |
| Outcomes for Unit I | communication system. | | | | | | | | |
| | · Co | • | | | | | | | |
| Unit II | Digital Modulation-I | (07 Hrs.) | | | | | | | |
| Baseband Signal Receive | r: Probability of Error, Optimal Receiver Design. | | | | | | | | |
| G | | | | | | | | | |
| Digital Modulation: Gen | eration, Reception, Signal Space Representation and Probability of I | Error Calculati | | | | | | | |
| for Binary Phase Shift Key | ying (BPSK), Binary Frequency <mark>Shift Keying (BFS</mark> K), Quadrature F | Phase Shift Keyi | | | | | | | |
| (QPSK), M-ary Phase Shi | ft Keying (MPSK). | | | | | | | | |
| Mapping of Course | CO2: Understand and explain various digital modulation technical | niques used in | | | | | | | |
| Outcomes for Unit II | digital communication systems and analyze their perform | nance in presen | | | | | | | |
| | of AWGN noise. | | | | | | | | |
| | | | | | | | | | |
| Unit III | Digital Modulation-II | (07 Hrs.) | | | | | | | |
| Generation, Reception, S | signal Space Representation and Probability of Error Calculation | on for Quadrati | | | | | | | |
| Amplitude Shift Keying | (QASK), M-ary FSK (MFSK), Minimum Shift Keying (MSK), | Pulse Shaping | | | | | | | |
| reduce Interchannel and | Intersymbol Interference, some Issues in transmission and rece | ption, Orthogon | | | | | | | |
| Frequency Division Multip | plexing (OFDM), Comparison of digital modulation systems. | | | | | | | | |
| Mapping of Course | CO2: Understand and explain various digital modulation | techniques | | | | | | | |
| Outcomes for Unit | used in digital communication systems and analyze | their | | | | | | | |
| ш | performance in presence of AWGN noise. | | | | | | | | |
| Unit IV Spread Spectrum Modulation (06 Hrs.) | | | | | | | | | |
| Use of Spread Spectrum, | Direct Sequence (DS) Spread Spectrum, Spread Spectrum and Cod- | e Division | | | | | | | |
| Multiple Access (CDMA), | Ranging Using DS Spread Spectrum, Frequency Hopping (FH) S | pread Spectrum | | | | | | | |
| Pseudorandom (PN) Seq | uences: Generation and Characteristics, Synchronization in Spread | Spectrum | | | | | | | |
| | | | | | | | | | |
| Systems | | | | | | | | | |
| Systems Mapping of Course | CO3: Describe and analyze the digital communication system v | with spread | | | | | | | |

| Unit V | Information Theoretic Approach to | (07 Hrs.) | | | | | | | | |
|--------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------|--------------------|--|--|--|--|--|--|--|--|
| | Communication System | | | | | | | | | |
| Introduction to informati | Introduction to information theory, Entropy and its properties, Source coding theorem, Huffman coding, | | | | | | | | | |
| Shannon-Fano coding, Di | screte memory less channel, Mutual information, Channel capacit | y, Channel coding | | | | | | | | |
| theorem, Differential entropy and mutual Information for continuous ensembles, Information Capacity theorem. | | | | | | | | | | |
| Mapping of Course | Mapping of Course CO4: Analyse a communication system using information theoretic approach. | | | | | | | | | |
| Outcomes for Unit V | | | | | | | | | | |
| | | | | | | | | | | |
| Unit VI | Error-Control Coding | (06 Hrs) | | | | | | | | |
| Linear Block Codes: Codin | ng, Syndrome and error detection, Error detection and correction ca | pability, Standard | | | | | | | | |
| array and syndrome decoding. Cyclic Codes: Coding & Decoding, Convolutional Codes: Coding & Decoding, | | | | | | | | | | |
| Introduction to Turbo Codes & LDPC Codes. | | | | | | | | | | |
| Mapping of Course | CO5: Use error control coding techniques to improve perform | nance of a digital | | | | | | | | |
| Outcomes for Unit VI | communication system. | | | | | | | | | |

Learning Resources

Text Books:

- 1. Taub, Schilling and Saha, "Principles of Communication Systems", McGraw-Hill, 4th Edition,
- 2. B.P. Lathi, Zhi Ding, "Modern Analog and Digital Communication System", Oxford University Press, 4th Edition.

Reference Books:

- Bernard Sklar, Prabitra Kumar Ray, "Digital Communications Fundamentals and Applications", Pearson Education, 2nd Edition
- 2. Wayne Tomasi, "Electronic Communications System", Pearson Education, 5th Edition
- 3. A.B Carlson, P B Crully, J C Rutledge, "Communication Systems", Tata McGraw Hill Publication, 5th Edition
- 4. Simon Haykin, "Communication Systems", John Wiley & Sons, 4th Edition
- 5. Simon Haykin, "Digital Communication Systems", John Wiley & Sons, 4th Edition.

MOOC / NPTEL Courses:

1. NPTEL Course on "Digital Communications"

Third Year of E & Tc Engineering (2019 Course)

304182: Electromagnetic Field Theory

| Teaching Scheme: | Credit | Examination Scheme: | | | | | |
|-----------------------|--------------|----------------------------|--|--|--|--|--|
| Theory: 03 hrs./week | 03 + 01 = 04 | In-Sem (Theory): 30 Marks | | | | | |
| Tutorial: 01 hr./week | | End Sem (Theory): 70 Marks | | | | | |
| | | Term Work: 25 Marks | | | | | |

Prerequisite Courses, if any:

- 1. Vectors, Vector Calculus
- 2. Coordinate Geometry, Cartesian, Cylindrical, Spherical
- 3. Engineering Mathematics III

Companion Course, if any: Electromagnetic Field Theory Tutorials

Course Objectives:

- Provide the foundation and rudiments of Electromagnetic theory essential to subsequent courses of radiation, microwave and wireless communications.
- Expose the students to basic laws of electro statics, magneto statics leading to the Maxwell Equations for static and dynamic fields.
- Extend these laws to Uniform Plane waves, transmission line theory and some of the case studies of
 applications of engineering electromagnetic field theory.
- The main focus will be on the physical interpretation of all the mathematical formulations and extend these concepts to real time applications in the field Electronics and Telecommunication Engineering.

Course Outcomes: On completion of the course, learner will be able to -

- **CO1:** Apply the basic electromagnetic principles and determine the fields (E & H) due to the given source.
- **CO2:** Apply boundary conditions to the boundaries between various media to interpret behavior of the fields on either sides.
- CO3: State, Identify and Apply Maxwell's equations (integral and differential forms) in both the forms (Static, time-varying or Time-harmonic field) for various sources, Calculate the time average power density using Poynting Theorem, Retarded magnetic vector potential.
- **CO4:** Formulate, Interpret and solve simple uniform plane wave (Helmholtz Equations) equations, and analyze the incident/reflected/transmitted waves at normal incidence.
- CO5: Interpret and Apply the transmission line equation to transmission line problems with load impedance to determine input and output voltage/current at any point on the Transmission line, Find input/load impedance, input/load admittance, reflection coefficient, SWR, Vmax/Vmin, length of transmission line using Smith Chart.

CO6: Carry out a detailed study, interpret the relevance and applications of Electromagnetics.

| Course Contents | | | | | | | | | | |
|-----------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------|---------------------|--|--|--|--|--|--|--|--|
| Unit I | Electrostatics | (08 Hrs.) | | | | | | | | |
| Review of 3D Coordinate | Review of 3D Coordinate Geometry, Vector Calculus, Physical significance of Gradient, Divergence, Curl, | | | | | | | | | |
| Electric field intensity(| E), Displacement Flux Density(D), Gauss's law, Electric poten | ntial(V), Potential | | | | | | | | |
| Gradient, E/D/V due to un | niform sources (point charge, infinite line charge, infinite surface ch | arge), Maxwell | | | | | | | | |
| Equations for Electrostation | es, Current, Current Density, physical interpretation. | | | | | | | | | |
| Application Case Study: Electrostatic Discharge, Cathode Ray Oscilloscope. | | | | | | | | | | |
| | | | | | | | | | | |
| | CO1: Apply the basic electromagnetic principles and determine | ne the fields (E & | | | | | | | | |
| Mapping of Course | H) due to the given source. | | | | | | | | | |
| Outcomes for Unit I | Co | • | | | | | | | | |
| | CO6: Carry out a detailed study, interpret the relevance an | d applications of | | | | | | | | |
| | Electromagnetics. | | | | | | | | | |
| Unit II | Magneto statics | (06 Hrs) | | | | | | | | |
| Lorentz force, magnetic | field intensity (H), Magnetic Flux Density(B), - Biot-Savart | s Law – Ampere's | | | | | | | | |
| Circuit Law – H due to | straight conductors, circular loop, infinite sheet of current, Maxv | well Equations for | | | | | | | | |
| Magneto Statics, physical | interpretation. | | | | | | | | | |
| Application Case Study: | Lightning, Magnetic Resonance Imaging (MRI). | | | | | | | | | |
| | CO1: Apply the basic electromagnetic principles and determin | e the fields (E & | | | | | | | | |
| Mapping of Course | H) due to the given source. | | | | | | | | | |
| Outcomes for Unit II | | | | | | | | | | |
| | CO6: Carry out a detailed study, interpret the relevance and a | pplications of | | | | | | | | |
| | Electromagnetics. | | | | | | | | | |
| | | | | | | | | | | |
| Unit III | Boundary Conditions | (06 Hrs) | | | | | | | | |
| Electric Dipole, Dielectric | Polarization, Properties of Conductors, Dielectric Materials, Box | undary conditions | | | | | | | | |
| (dielectric-dielectric, con | nductor -dielectric), significance and applications of Poisson | 's and Laplace's | | | | | | | | |
| equations - Capacitance, Energy density. | | | | | | | | | | |
| Magnetization, magnetic materials, Boundary conditions for Magnetic Fields, Magnetic force, Torque. | | | | | | | | | | |
| Application Case Study: RF MEMS, Magnetic Levitation, Electromagnetic Pump. | | | | | | | | | | |
| | CO2: Apply boundary conditions to the boundaries between va | arious media to | | | | | | | | |
| Mapping of Course | interpret behavior of the fields on either sides. | | | | | | | | | |
| Outcomes for Unit III | | | | | | | | | | |
| | CO6: Carry out a detailed study, interpret the relevance and a | pplications of | | | | | | | | |
| | Electromagnetics. | | | | | | | | | |

Unit IV Time Varying Electromagnetic Fields: Maxwell (06 Hrs) Equations

Scalar and Vector Magnetic Potential, Poisson's and Laplace Equations, Faraday's law, Translational and motional emf, Displacement current density, Continuity Equation, Time varying Maxwell's equations - point form, integral form, Power and Poynting theorem, concept of Retarded magnetic vector potential,

Application Case Study: Memristor, Electric Motors, Generators.

CO3: State, Identify and Apply Maxwell's equations (integral and differential forms) in both the forms (Static, time-varying or Time-harmonic field)

Mapping of Course Outcomes for Unit IV

CO6: Carry out a detailed study, interpret the relevance and applications of Electromagnetics

Unit V

Uniform Plane Waves

(6 Hrs)

Maxwell's equation using phasor notations, Electromagnetic wave equations (Helmholtz equation), Relation between E and H, depth of penetration, concept of polarization, Reflection by perfect conductor-normal incidence, reflection by perfect dielectric-normal incidence, Snell's law.

Application Case Study: Comparison of Circuit Theory at low frequency and Field theory at High frequencies, Antenna Radiation Mechanism, Propagation of EM energy.

| | CO4: Formulate, Interpret and solve simple uniform plane wave (Helmholtz | | | | | | | |
|--------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------|----------|--|--|--|--|--|--|
| | Equations) equations, and analyze the incident/reflected/transmitted | | | | | | | |
| Mapping of Course | waves at normal incidence. | | | | | | | |
| Outcomes for Unit V CO6: Carry out a detailed study, interpret the relevance and applications of | | | | | | | | |
| | Electromagnetics. | | | | | | | |
| | | | | | | | | |
| Unit VI | Transmission Line Theory | (06 Hrs) | | | | | | |

Line parameters, skin effect, general solution, physical significance of the equations, wavelength, velocity of propagation, the distortion less line, Reflection on a line not terminated in Z0, reflection coefficient, open and short circuited lines, reflection coefficient and reflection loss, standing waves; nodes; standing wave ratio, Input impedance of dissipation less line, Smith Chart and its applications in solving the transmission line parameters.

Application Case Study: Coaxial Cable, Twisted Pair, Microwave Waveguides

| | CO5: Interpret and Apply the transmission line equation to transmission line |
|----------------------|------------------------------------------------------------------------------|
| | problems with load impedance to determine input and output |
| | voltage/current at any point on the Transmission line, Find input/load |
| Mapping of Course | impedance, input/load admittance, reflection coefficient, SWR, |
| Outcomes for Unit VI | Vmax/Vmin, length of transmission line using Smith Chart. |
| | |
| | |

CO6: Carry out a detailed study, interpret the relevance and applications of Electromagnetics.

304183: Database Management

| Teaching Scheme: | Credit | Examination Scheme: |
|------------------------|--------|----------------------------|
| Theory: 03 hrs. / week | 03 | In-Sem (Theory): 30 Marks |
| | | End Sem (Theory): 70 Marks |

Prerequisite Courses, if any:

1. Data Structures

Companion Course, if any: Database Management Lab

Course Objectives:

- To understand fundamental concepts of database from its design to its implementation.
- To analyze database requirements and determine the entities involved in the system and with one another.
- To manipulate database using SQL Query to create, update and manage Database.
- Be familiar with the basic issues of transaction processing and concurrency control.
- To learn and understand Parallel Databases and its Architectures.
- To learn and understand Distributed Databases and its applications.

Course Outcomes: On completion of the course, learner will be able to -

CO1: Ability to implement the underlying concepts of a database system.

CO2: Design and implement a database schema for a given problem-domain using data model.

CO3: Formulate, using SQL/DML/DDL commands, solutions to a wide range of query and update problems.

CO4: Implement transactions, concurrency control, and be able to do Database recovery.

CO5: Able to understand various Parallel Database Architectures and its applications.

CO6: Able to understand various Distributed Databases and its applications.

| | | Course Contents | |
|--------|---|----------------------|-----------|
| Unit I | 1 | Introduction to DBMS | (07 Hrs.) |

Introduction to Database Management Systems, Purpose of Database Systems, Database-System Applications, Data Abstraction and Database System Structure.

Relational Model: Structure of relational databases, Domains, Relations, Relational algebra – fundamental operators and syntax, relational algebra queries, tuple relational calculus.

Entity-Relationship model: Basic Concepts, Entity Set, Relationship Sets and Weak Entity Sets, Mapping Cardinalities, Keys, E-R diagrams, Design Issues, Extended E-R Features, Converting E-R & EER diagram into tables.

| Mapping | of | Course | CO1: Ability to implement the underlying concepts of a database system. |
|----------|-------|--------|-------------------------------------------------------------------------|
| Outcomes | | | |
| Outcomes | tor C | III I | |

| Unit II | Relational Database Design | (06 Hrs.) | |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------|--|
| Basic concepts, CODD's Rules, Relational Integrity: Domain, Referential Integrities, Enterprise Constraints, Database Design: Features of Good Relational Designs, Normalization, Atomic Domains and First Normal Form, Decomposition using Functional Dependencies, Algorithms for Decomposition, 2NF, 3NF, 4NF and BCNF. | | | |
| Mapping of Course Outcomes for Unit II | CO2: Design and implement a database schema for a give domain using data model. | n problem- | |
| | | | |
| Unit III | Basics of SQL | (07 Hrs.) | |
| key, Not null, Check, IN o | ture: Creation, Alteration, Defining constraints – Primary key, Fore perator, Functions - Aggregate Functions, Built-in Functions – Num, sub-queries, correlated subqueries, Use of group by, having, order wand its types. | eric, Date, String | |
| Transaction control co Procedures, Stored Function | ommands: Commit, Rollback, Save-point PL/SQL Concepts: on, Database Triggers. | Cursors, Stored | |
| Mapping of Course Outcomes for Unit III | CO3: Formulate, using SQL/DML/DDL commands, solut range of query and update problems. | ions to a wide | |
| | | | |
| Unit IV | Database Transactions Management | (07 Hrs.) | |
| Serial Schedule, Serializ Schedules, Concurrency C Mapping of Course | caction, Transaction Management, Properties of Transactions, Corability: Conflict and View, Cascaded Aborts, Recoverable and control: Need, Locking Methods, Deadlock handling and Time-stam CO4: Implement transactions, concurrency control, and I | Non-recoverable p based Protocols. | |
| Outcomes for Unit IV | Database recovery. | | |
| | | (0.5.77 | |
| Unit V | Parallel Databases | (06 Hrs.) | |
| Introduction to Database Architectures: Multi-user DBMS Architectures, Case study- Oracle Architecture. Parallel Databases: Performance Parameters for Parallel Databases, Types of Parallel Database Architecture, Evaluating Parallel Query in Parallel Databases and Virtualization on Multicore processors. | | | |
| Mapping of Course CO5: Able to understand various Parallel Database Architectures and applications. | | | |
| | | | |
| Unit VI | Distributed Databases | (07 Hrs.) | |
| Distributed Databases: Distributed Database Management System, Factors Encouraging DDBMS, Advantages of Distributed Databases, Types of Distributed Databases, Architecture of Distributed Databases, Distributed Database Design, Distributed Data Storage, and Distributed Transaction: Basics, Failure modes, Commit Protocols, Concurrency Control in Distributed Database. | | | |
| Mapping of Course Outcomes for Unit VI | CO6: Able to understand various Distributed Datapplications. | abases and its | |

Third Year of E & Tc Engineering (2019 Course)

304184: Microcontroller

| Teaching Scheme: | Credit | Examination Scheme: |
|----------------------|--------|----------------------------|
| Theory: 03 hrs./week | 03 | In-Sem (Theory): 30 Marks |
| | | End Sem (Theory): 70 Marks |

Prerequisite Courses, if any:

- 1. Digital Logic Design
- 2. Electronic Components and Hardware
- 3. Basics of C Language.

Companion Course, if any: Microcontroller Lab

Course Objectives: During the course study students will be able to

- Understand architecture and features of 8051 and PIC18FXX Microcontroller.
- Learn interfacing of real-world peripheral devices with microcontroller.
- Explore different features of PIC 18F Microcontroller with Architecture.
- Use concepts of timers and interrupts of PIC 18 in programming.
- Design and develop microcontroller based embedded application.
- Demonstrate real life applications using PIC 18.

Course Outcomes: On completion of the course, learner will be able to -

CO1: Understand the fundamentals of microcontroller and programming.

CO2: Interface various electronic components with microcontrollers.

CO3: Analyze the features of PIC 18F XXXX.

CO4: Describe the programming details in peripheral support.

CO5: Develop interfacing models according to applications.

CO6: Evaluate the serial communication details and interfaces.

Course Contents

| Unit I | Introduction to Microcontroller Architecture | (06 Hrs.) |
|--------|----------------------------------------------|-----------|
| | | |

Difference between microprocessor and microcontroller Introduction to the Microcontroller classification, Feature and block diagram of 8051 and explanation, Program Status Word (PSW), 8051. Overview of Instruction set, memory organization, Interrupt structure, timers and its modes, Serial communication: concept of baud rate, Data transmission and reception using Serial port. Sample programs of data transfer, Delay using Timer (0&1) and interrupt, Data transmission and reception using Serial port. I/O Port Programming, All programs in Clanguage.

Third Year of E & Tc Engineering (2019 Course)

304185 (A): Digital Signal Processing (Elective - I)

| Teaching Scheme: | Credit | Examination Scheme: |
|------------------------|--------|----------------------------|
| Theory: 03 hrs. / week | 03 | In-Sem (Theory): 30 Marks |
| | | End Sem (Theory): 70 Marks |

Prerequisite Courses, if any:

1. Signals & Systems

Companion Course, if any: Digital Signal Processing Lab

Course Objectives:

- Understand the sampling, aliasing and block schematic of digital signal processing.
- Introduction of transforms for analysis of systems using Z transform.
- Introduction of DFT, FFT, DCT transforms for analysis of DT signals.
- Design and implementation of IIR digital filters.
- Design and implementation of FIR digital filters.
- Apply DSP algorithms/techniques.

Course Outcomes: On completion of the course, student will be able to -

CO1: Interpret and process discrete/ digital signals and represent DSP system.

CO2: Analyze the digital systems using the Z-transform techniques.

CO3: Implement efficient transform and its application to analyze DT signals.

CO4: Design and implement IIR filters.

CO5: Design and implement FIR filters.

CO6: Apply DSP techniques for speech/biomedical/image signal processing.

Course Contents Unit I DSP Preliminaries (06 Hrs.)

Discretization of Analog Signals: Sampling theorem in time domain, recovery of analog signals, and analytical treatment with examples, mapping between analog frequencies to digital frequency, Concept of Interpolation and decimation in signal processing, Representation of signals as vectors, concept of Basis function and orthogonality, Basic elements of DSP and its requirements, advantages of Digital over Analog signal processing, Introduction to DSP processor (TMS 320 XX 6713).

| Mapping of Course Outcomes for Unit I | CO1: Interpret and process discrete/ digital signals and repre | sent DSP system. |
|------------------------------------------|----------------------------------------------------------------|------------------|
| Unit II | Z-Transform | (06 Hrs.) |

Need for Z-transform, relation between Laplace transform and Z transform, relation between Fourier transform and Z transform, Concept of ROC and Properties of ROC, Relation between pole locations and time domain

behavior, causality and stability considerations for LTI systems, Solution of difference equations using Z transform.

Mapping of Course Outcomes for Unit II

CO2: Analyze the digital systems using the Z-transform techniques.

Unit III

Transforms (DFT-FFT) (08 Hrs.)

Frequency domain sampling, DFT, Properties of DFT, circular convolution, Computation of linear convolution using circular convolution, FFT, decimation in time (DIT) and decimation in frequency(DIF) using Radix-2 FFT algorithm for 4 point and 8 point sequences, DFT & FFT computation complexity for 4 point and 8 point sequences, Linear filtering (Block convolution or Long sequence convolution) using overlap add and overlap save method.

Mapping of Course Outcomes for Unit III

Unit IV

CO3: Implement efficient transform and its application to analyze DT signals.

IIR Filter Design

(06 Hrs.)

Concept of analog filter design, IIR filter design by approximation of backward derivatives, IIR filter design by impulse invariance method, Bilinear transformation method, warping effect. Butterworth filter design, Characteristics of Butterworth filters and Chebyshev filters, IIR filter realization using direct form, cascade form and parallel form, Finite word length effect in IIR filter design.

Mapping of Course Outcomes for Unit IV

Unit V

FIR Filter Design (06 Hrs.)

Windowing techniques: Gibbs phenomenon, characteristics and comparison of different window functions, Linear phase conditions: impulse and phase and group delays, Design of linear phase FIR filter using windows: Rect, Hanning, Hamming, Blackmann & Kaiser, Magnitude and Phase response of Digital filters, Frequency response of Linear phase FIR filters, FIR filter realization using Direct Form, Cascade and linear phase structure.

Mapping of Course Outcomes for Unit V

Unit VI

Introduction to 1D & 2D Signal Processing (06 Hrs.)

Dimensionality of signals, Introduction of 1D signals

Speech: Basics of speech signal and its features, LTI representation of speech signal, Estimation of fundamental frequency, identification of voiced and unvoiced speech and noise removal

Biomedical Signal: Basics of ECG and its features, Spectral Analysis using FFT, Artifacts suppression,

Algorithms for R peak detection

Fundamentals of image processing: Representation of digital image, Spatial and Temporal resolution, 2D convolution for feature extraction.

Mapping of Course Outcomes for Unit VI CO6: Apply DSP techniques for speech/biomedical/image signal Processing.

Learning Resources

Text Books:

- 1. John G. Proakis, Dimitris G. Manolakis, "Digital Signal Processing: Principles, Algorithms and Applications", Pearson Prentice Hall, 4th Edition.

Third Year of E & Tc Engineering (2019 Course)

304185 (B): Electronic Measurements (Elective - I)

| Teaching Scheme: | Credit | Examination Scheme: |
|----------------------|--------|----------------------------|
| Theory: 03 hrs./week | 03 | In-Sem (Theory): 30 Marks |
| | | End Sem (Theory): 70 Marks |

Prerequisite Courses, if any:

- 1. Basic Electronics Engineering
- 2. Electronic Skill Development Lab

Companion Course, if any: Electronic Measurements Lab

Course Objectives: To make the students understand

- Fundamental principles of measurement systems.
- Basic electronics measuring instruments and analyzers.
- Use of different types of Signal Generators.
- Working principle and use of different types of Oscilloscopes.
- Use of other display devices, recorders and timer/counter.
- Advanced measurement systems.

Course Outcomes: On completion of the course, learner will be able to:

CO1: Understand the metrics for the measurement system

CO2: Select and use the instruments for measurement & analysis of basic electronic parameters

CO3: Identify and use the different signal generators for specific applications

CO4: Understand the principles of different Oscilloscopes for specific applications

CO5: Identify the use of other display devices, recorders and timer/counter in measurement systems

CO6: Use the advanced measurement systems for electronics parameter measurement

Course Contents Unit I Basics of Measurements (06 Hrs.) Units Systems, Standards, Measurement system characteristics (static and dynamic), Statistical metrics in measurement systems, probability of errors, Calibration of measurement system. Mapping of Course Outcomes for Unit I Unit II Electronics Measurements (07 Hrs.)

Voltage & current measurement, Digital Voltmeter (DVM), types of DVM, Digital Multi meter, true r.m.s. voltmeter, Vector voltmeter, Impedance meter, Q-meter, Harmonic Distortion analyzers, Wave analyzer, Spectrum Analyzer, Network Analyzer, Logic Analyzer.

| Mapping of Course Outcomes for Unit II | CO2: Select and use the instruments for measurement & analysis of basic electronic parameters. | | |
|-----------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------|------------------|--|
| Unit III | Signal Generators | (06 Hrs.) | |
| Audio, RF, Micro wave sig | gnal generators, Frequency synthesis techniques, Synthesizers, digit | al signal | |
| generators, Noise generator | ors, characteristics of Pulse, signal and noise. | | |
| Mapping of Course Outcomes for Unit III | CO3: Identify and use different signal generators for spec applications. | eific | |
| | | | |
| Unit IV | Special purpose CRO | (07 Hrs.) | |
| Dual trace CRO, DSO, Sa | ampling CRO, curve Tracer, Power Oscilloscopes, Delayed sweep | CRO, Component | |
| Test, Z-modulation and X- | -Y mode operations, Measurements on oscilloscope, Oscilloscope ac | ecessories. | |
| Mapping of Course Outcomes for Unit IV | CO4: Understand the principles of different Oscilloscopes applications. | s for specific | |
| | | | |
| Unit V | Display devices, Recorders and universal | (06 Hrs.) | |
| | counter / Timer | | |
| LCD Display, LED/OLED Display, Plasma Display, X-Y Plotters, Strip Chart Recorders, Universal counter/ | | | |
| Timers (for time period, time interval, frequency, frequency ratio and pulse measurement), | | | |
| Communication buses PC | / instruments (EIA/TIA 232, 423, 422, 488), Internal & external ac | quisition cards. | |

Third Year of E & Tc Engineering (2019 Course)

304185 (C): Fundamentals of JAVA Programming (Elective - I)

| Teaching Scheme: | Credit | Examination Scheme: |
|----------------------|--------|----------------------------|
| Theory: 03 hrs./week | 03 | In-Sem (Theory): 30 Marks |
| | | End Sem (Theory): 70 Marks |

Prerequisite Courses, if any:

- 1. Data Structures
- 2. Object Oriented Programming concept

Companion Course, if any: Fundamentals of JAVA Programming Lab

Course Objectives:

- Make the students familiar with basic concepts and techniques of object oriented programming in Java.
- Develop an ability to write various programs in Java for problem solving.

Course Outcomes: On completion of the course, learner will be able to -

CO1: Understand the basic principles of Java programming language

CO2: Apply the concepts of classes and objects to write programs in Java

CO3: Demonstrate the concepts of methods & Inheritance

CO4: Use the concepts of interfaces & packages for program implementation

CO5: Understand multithreading and Exception handling in Java to develop robust programs

CO6: Use Graphics class, AWT packages and manage input and output files in Java

Course Contents

| Unit I | JAVA Fundamentals | (08 Hrs.) |
|--------|-------------------|-----------|

Review of Object oriented concepts, Evolution of Java, Comparison of Java with other programming languages, Java features, Java and World Wide Web, Java Run Time Environment. JVM architecture. Overview of Java Language, Simple Java Program, Java Program Structure. Installing and Configuring Java.

Java Tokens, Java Statements, Constants, variables, data types. Declaration of variables, Giving values to variables, Scope of variables, arrays, Symbolic constants, Typecasting, Getting values of variables, Standard default values, Operators, Expressions, Type conversion in expressions, Operator precedence and associatively, Mathematical functions, Control statements- Decision making & looping.

| Mapping | of | Course | CO1: Understand the basic principles of Java programming language. |
|----------|-------|--------|--------------------------------------------------------------------|
| Outcomes | for U | Init I | |

Unit II

Classes and Objects

(06 Hrs.)

Class Fundamentals, Creating Objects, Accessing Class members, Assigning Object reference variables, Methods, Constructors, using objects as parameters, Argument passing, returning objects, Method Overloading, static members, Nesting of Methods, this keyword, Garbage collection, finalize methods, , final variables and methods, final class.

Mapping of Course CO2: Apply the concepts of classes and objects to write programs in Java

Outcomes for Unit II

Unit III

Methods & Inheritance in JAVA

(06 Hrs.)

Abstract Methods and classes, Strings, One dimensional and two dimensional arrays, wrapper classes, enumerated types, Command line arguments

Inheritance: Inheritance in Java, Creating Multilevel hierarchy, Constructors in derived class, Method overriding, Dynamic method dispatch.

Mapping of Course CO3: Demonstrate the concepts of methods & Inheritance.

Outcomes for Unit III

Unit IV

Interfaces & Packages

(06 Hrs.)

Interfaces: Define, implement and extend, Accessing Interface variables, Default interface methods, Using static method in interface

Packages: Java API Packages, Using System Packages, Creating accessing and using a package, Importing packages, Adding a class to a Package, Hiding classes.

Mapping

of Course CO4: Use the concept of interfaces & packages for program implementation.

Outcomes for Unit IV

Unit V

Multithreading & Exception Handling

(06 Hrs.)

Introduction to multithreading: Introduction, Creating thread and extending thread class. Concept of Exception handling: Introduction, Types of errors, Exception handling syntax, Multiple catch statements.

I/O basics, Reading console inputs, Writing Console output. Applets: Concepts of Applets, differences between applets and applications, life cycle of an applet, types of applets, creating a simple applet.

Mapping of Course CO5: Understand multithreading and Exception handling in Java to develop

Outcomes for Unit V

robust programs

Unit VI Graphics Programming and File Handling (06 Hrs.)

Graphics class, Introduction to AWT packages, Handling events on AWT components, Introduction to Swing package, components and containers.

Managing input/output files: Concept of streams, Stream Classes, Byte stream, Character stream, Using Stream, creation of files, reading or writing characters / bytes, Concatenating and buffering files, Random access files.

Mapping of Course CO6: Use Graphics class, AWT packages and manage input and output files in Outcomes for Unit VI Java

Learning Resources

Text Books:

304185 (D): Computer Networks (Elective - I)

| Teaching Scheme: | Credit | Examination Scheme: |
|----------------------|--------|----------------------------|
| Theory: 03 hrs./week | 03 | In-Sem (Theory): 30 Marks |
| | | End Sem (Theory): 70 Marks |

Prerequisite Courses, if any:

- 1. Principles of Communication Systems
- 2. Digital Communication

Companion Course, if any: Computer Networks Lab

Course Objectives:

- To understand the concepts of networking, its standards and protocols.
- To learn controlling techniques in networking at different layers.
- To learn protocols at different layers of reference model.
- To understand routing and networking in inter and intra domain.
- To learn network programming.
- To understand applications, protocols and its implication in networks.

Course Outcomes: On completion of the course, learner will be able to -

- **CO1:** Design LAN using appropriate networking architecture, topologies, transmission media, and networking devices.
- CO2: Understand the working of controlling techniques for flawless data communication using data link layer protocols.
- **CO3:** Learn the functions of network layer, various switching techniques and internet protocol addressing.
- **CO4:** Explore various interior and exterior, unicasting and multicasting protocols.
- CO5: Analyze data flow using TCP/UDP Protocols, congestion control techniques for QoS.

CO6: Illustrate the use of protocols at application layer.

Course Contents

| Unit I | Basics of Network & Physical Layer | (07 Hrs.) |

304186: Digital Communication Lab

| Teaching Scheme: | Credit | Examination Scheme: |
|---------------------------|--------|---------------------|
| Practical: 02 hrs. / week | 01 | Practical: 50 Marks |

Prerequisite Courses, if any:

- 1. Principles of Communication Systems
- 2. Signals & Systems
- 3. Control Systems
- 4. Digital Circuits
- 5. Electronic Circuits.

Companion Course, if any: Digital Communication Theory

Guidelines for Instructor's Manual

Design minimum 10 Assignments on the topics listed under Group A & B Below & prepare your own Instructor's Manual. Minimum 2 experiments should be designed from group A & B each and Minimum 3 can be from group C &D each. Use of highend equipment like USRP is encouraged for Group A & B experiments.

Guidelines for Student's Lab Journal

The student's Lab Journal can be experimental write-ups. It should include following as applicable: Assignment No, Title of Assignment, Date of Performance, Date of Submission, Aims & Objectives, Theory, Description of data used, Results, Conclusion.

Guidelines for Lab/TW Assessment

The practical examination will be based on the work carried out by the student in the Lab course. Suitable rubrics can be used by the internal & external examiner for assessment.

List of Laboratory Experiments Group A (Any Two) 1. Study of BPSK transmitter & receiver using suitable hardware setup/kit. 2. Study of QPSK transmitter & receiver using suitable hardware setup/kit. 3. Study of BFSK transmitter & receiver using suitable hardware setup/kit.

| 4. | Study of Baseband receiver performance in presence of Noise using suitable hardware setup/kit. |
|----|--------------------------------------------------------------------------------------------------|
| | Group B (Any Two) |
| 1. | Study of Error Control Coding using suitable hardware setup/kit. |
| 2. | Study of DSSS transmitter and receiver using suitable hardware setup/kit. |
| 3. | Study of FHSS transmitter and receiver using suitable hardware setup/kit. |
| | Group C (Any Three) |
| 1 | Simulation study of Performance of M-ary PSK. |
| 2 | Simulation study of Performance of M-ary QAM. |
| 3 | Simulation study of OFDM transmitter & receiver. |
| 4 | Simulation study of random processes. Find various statistical parameters of the random process. |
| 5 | Simulation Study of performance of BPSK receiver in presence of noise. |
| 6 | Simulation Study of CDMA technique. |
| | Group D (Any Three) |
| 1 | Simulation study of Source Coding technique. |
| 2 | Simulation study of various Entropies and mutual information in a communication system. |
| 3 | Simulation Study of Linear Block codes. |
| 4 | Simulation Study of cyclic codes. |
| 5 | Simulation Study of Convolutional codes |
| 6 | Simulation Study of Performance of Digital communication system with error control coding. |

Third Year of E & Tc Engineering (2019 Course)

304187: Database Management Lab

| Credit | Examination Scheme: |
|--------|---------------------|
| 01 | Oral: 25 Marks |
| | |

Prerequisite Courses, if any:

Companion Course, if any: Database Management System

| | List of Laboratory Expaniments |
|----|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| | List of Laboratory Experiments |
| | Group A- Database Programming Languages – SQL |
| 1. | Study of Open Source Relational Databases: MySQL |
| 2. | Design and develop at SQL DDL statements which demonstrate the use of SQL objects such as |
| | Table, View, Index, Sequence and Synonym. |
| 3. | Design and develop at least 5SQL queries for suitable database application using SQL DML |
| | statements: Insert and Select with operators and functions. |
| 4. | Design and develop at least 5 SQL queries for suitable database application using SQL DML |
| | statements: Update and Delete with operators and functions. |
| 5. | Design and develop at least 5 SQL queries for suitable database application using SQL DML |
| | statements: all types of Join and Sub-Query. |
| | Group B- Database Programming Languages – PL / SQL |
| 6. | Write a PL/SQL block of code for the following requirements:- |
| | Schema: 1. Borrower (Roll no., Name, Date of Issue, Name of Book, Status) |
| | 2. Fine (Roll no, Date, Amt.) |
| | Accept roll no. & name of book from user. |
| | • Check the number of days (from date of issue), if days are between 15 to 30 then fine amount will be Rs 5per day. |
| | • If no. of days>30, per day fine will be Rs 50 per day & for days less than 30, Rs. 5 per |
| | day. |
| | After submitting the book, status will change from I to R. If the limit of Grant I is a first of the limit of the linitial of the limit of the limit of the limit of the limit of the |
| | • If condition of fine is true, then details will be stored into fine table. |
|) | Frame the problem statement for writing PL/SQL block in line with above statement. |
| 7. | Cursors: (All types: Implicit, Explicit, Cursor FOR Loop, Parameterized Cursor) |
| | Write a PL/SQL block of code using parameterized Cursor that will merge the data available in the |

newly created table N_RollCall with the data available in the table O_RollCall. If the data in the

Frame the separate problem statement for writing PL/SQL block to implement all types of Cursors in line with above statement. The problem statement should clearly state the

first table already exist in the second table then that data should be skipped.

| | requirements. |
|------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------|
| 8. | PL/SQL Stored Procedure and Stored Function. |
| | Write a Stored Procedure namely proc_Grade for the categorization of student. If marks scored by |
| | students in examination is <=1500 and marks>=990 then student will be placed in distinction |
| | category if marks scored are between 989 and 900 category is first class, if marks 899 and 825 |
| | category is Higher Second Class |
| | Write a PL/SQL block for using procedure created with above requirement. Stud_Marks(name, |
| | total_marks) Result(Roll,Name, Class). |
| | Frame the separate problem statement for writing PL/SQL Stored Procedure and function, |
| | in line with above statement. The problem statement should clearly state the requirements. |
| 9. | Database Trigger (All Types: Row level and Statement level triggers, Before and After Triggers). |
| | Write a database trigger on Library table. The System should keep track of the records that are |
| | being updated or deleted. The old value of updated or deleted records should be added in |
| | Library_Audit table. |
| | Frame the problem statement for writing Database Triggers of all types, in-line with above |
| | statement. The problem statement should clearly state the requirements. |
| | Group C- Mini Project: Database Project Life Cycle |
| 11. | Implement MYSQL/Oracle database connectivity with PHP/python/Java Implement Database |
| | navigation operations (add, delete, edit,) using ODBC/JDBC. |
| 12. | Using the database concepts covered in Group A & Group B & connectivity concepts covered in |
| | Group C, students in group are expected to design and develop database application with |
| | following details: |
| | Requirement Gathering and Scope finalization |
| | Database Analysis and Design: Design Entity Relationship Model, Relational Model, Database Normalization |
| | • Implementation : |
| | Front End: Java/Perl/PHP/Python/Ruby/.net Backend: MYSQL/Oracle |
| | Database Connectivity: ODBC/JDBC |
| | Testing: Data Validation |
| | Group of students should submit the Project Report which will be consist of documentation related |
| | to different phases of Software Development Life Cycle: Title of the Project, Abstract, |
| | Introduction, scope, Requirements, Data Modeling features, Data Dictionary, Relational Database |
| | Design, Database Normalization, Graphical User Interface, Source Code, Testing document, |
| | Conclusion. Instructor should maintain progress report of mini project throughout the semester |
| | from project group and assign marks as a part of the term work. |

Third Year of E & Tc Engineering (2019 Course)

304189(A): Digital Signal Processing Lab (Elective – I)

| 8. | Design the symmetric FIR low pass filter for which desired frequency response is expressed as |
|-----|-----------------------------------------------------------------------------------------------|
| | Hd (w)= $\{(e^{-jw\tau} for w \le wc) and 0 elsewhere$ |
| | The length of the filter should be $M = 7$ and $Wc=1$ radians/sample. |
| | Make use of the Rectangular/ Hamming/ Hanning/Blackman/ Kaiser window. |
| 9. | Verify the Sampling Theorem in frequency domain using FFT for undersampled, Nyquist and |
| | oversampled signals. |
| 10. | Compute the DFT by writing a function for the N>32 sequence. Calculate the computational |
| | complexity. Compare the time required by DFT & FFT functions. |
| | Group C (Any two) |
| 11. | Implement the Block Convolution algorithms: a) Overlap-add b) Overlap-save |
| 12. | Find the pitch frequency of given speech signal using the autocorrelation method |
| 13. | Implement the following ECG Signal Processing operations: |
| | a) Suppression of motion artifacts in ECG using N point moving average filters. |
| | b) Peak detection of ECG signal by using Band-limiting digital filters |
| 14. | Image feature extraction using 2D convolution |

| | G | roup A (All are Co | ompulsory) | | | | |
| 1. | Write some simple prog | grams in Java such as: | | | | | |
| | i) To find factorial of r | number. | | | | | |
| | ii) To display first 50 p | orime numbers. | 100 | | | | |
| | iii) To find sum and ave | erage of N numbers | | | | | |
| 2. | Write a program in Ja | va to implement a Calci | ulator with simple arithmetic operations such as | | | | |
| | add, subtract, multiply, | divide, factorial etc. usin | ng switch case and other simple java statements. | | | | |
| | The objective of this as | signment is to learn Cons | stants, Variables, and Data Types, Operators and | | | | |
| | Expressions, Decision making statements in Java. | | | | | | |
| 3. | Write a program in Java with class Rectangle with the data fields width, length, area and colour. | | | | | | |
| | The length, width and area are of double type and colour is of string type. The methods are | | | | | | |
| | get_length(), get_width(), get_colour() and find_area(). Create two objects of Rectangle and | | | | | | |
| | compare their area and colour. If the area and colour both are the same for the objects then | | | | | | |
| | display "Matching Rectangles", otherwise display "Non-matching Rectangle" | | | | | | |
| 4. | Write a program in JAVA to demonstrate the method and constructor overloading | | | | | | |
| | | Group B (Any | Four) | | | | |
| 5 | Write Programs in Jav | va to sort i) List of inte | egers ii) List of names. The objective of this | | | | |
| | assignment is to learn A | Arrays and Strings in Java | ı | | | | |
| 6. | Write a Program in Jav | a to add two matrices. Th | e objective of this assignment is to learn Arrays | | | | |
| | in Java | | | | | | |
| 7. | Write a program in | Java to create a play | ver class. Inherit the classes Cricket_player, | | | | |
| | Football_player and H | lockey_player from play | er class. The objective of this assignment is to | | | | |
| | learn the concepts of in | | | | | | |
| 8. | Write a Java program | which imports user de | fined package and uses members of the classes | | | | |
| | contained in the packag | e. | | | | | |
| 9. | Write a Java program v | which implements interfa | ce. | | | | |

| 10 | Write a program to create multiple threads and demonstrate how two threads communicate with |
|--------|------------------------------------------------------------------------------------------------|
| | each other. |
| | Group C (Any Three) |
| 11. | Write a java program which use try and catch for exception handling. |
| | |
| 12. | Write a Java program to draw oval, rectangle, line, text using graphics class |
| 13. | Write a java program in which data is read from one file and should be written in another file |
| | line by line. |
| 14. | A Mini project in Java: A group of 4 students can develop a small application in Java |
| | 49 |

304190: Skill Development

| Teaching Scheme: | Credit | Examination Scheme: |
|---------------------------|--------|---------------------|
| Practical: 02 hrs. / week | 01 | Term work: 25 Marks |

Prerequisite Courses, if any:

- 1. Basics of Electronics Components
- 2. Working of Operational amplifier
- 3. Basics of Electronics measurement instruments and Tools

Companion Course, if any: --

Course Objectives:

- To build and upgrade practical knowledge of an individual.
- To make students Employable with required skill set.
- To promote youth work to assist "Make in India" initiative.
- To grow and build confidence among students on specific skill sets.
- To cultivate Entrepreneur mindset after getting required experience.
- To improve professional skills such as moral/ethics/team work/communication skill/lifelong learning etc.

Course Outcome: After Successfully completing the course,

- **CO1:** Student should recognize the need to engage in independent and life-long learning in required skill sets
- **CO2:** Student needs to experience the impact of industries on society by visiting different industries and understand the importance of industrial products for analog and digital circuits and systems.
- CO3: Student has to make use of the modern electronic and IT Engineering Tools and Technologies for solving electronic engineering problems.
- CO4: Student would be able to communicate effectively at different technical and administrative levels.
- CO5: Student will exhibit leadership skills both as an individual and as a member in a team in multidisciplinary environment.

List of Laboratory Experiments

Group A (Any Three)

Testing /Measurement/Calibration/Troubleshooting/Maintenance/Installation

Case studies on Study, Testing and maintenance of Batteries.
 A. Apply skill sets mentioned in #Group A Skills I and may be covered as per availability of lab

A. Apply skill sets mentioned in #Group A Skills I and may be covered as per availability of lab or equipment's.

OR

| | B. Apply Skill sets mentioned in #Group A Skills 1 may be covered by visiting any Automobile | | | | |
|----|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--|--|--|--|
| | service centers/Battery maintenance service centers or related industry. | | | | |

| | Note: Batteries of e-Vehicle & Technology Involved (Lithium Batteries etc.) | | | | |
| 2. | Case study on Automotive Electronics. (Sensors, Clusters, Controls, Semiconductor's | | | | |
| | devices etc.) A. Apply Skill set mentioned in #Group A Skills 1and Group A Skills 2 which is related to | | | | |
| | automotive electronics may be covered as per availability of lab or equipment's. | | | | |
| | OR | | | | |
| | B. Apply Skill sets mentioned in # <i>Group A Skills 1</i> may be coveredby visiting any Automobile service centers or related industry. | | | | |
| 2 | Constant and the second | | | | |
| 3. | Case study on Biomedical Instrumentation A. Apply Skill set mentioned in #Group A Skills 3 which is related to automotive electronics may | | | | |
| | be covered as per availability of lab or equipment's. | | | | |
| | OR | | | | |
| | B. Visit biomedical instrument maintenance service centers | | | | |
| | OR | | | | |
| | C. Visit Hospitals or related industry. | | | | |
| | | | | | |
| | Note: Students are expected to know about sensors technology / Interface / maintenance / | | | | |
| | calibration of electronic instrumentation of some of these equipment's. | | | | |
| 4. | Troubleshooting and maintenance of PCB Boards & Controllers | | | | |
| 5. | Troubleshooting and maintenance of Power supply | | | | |
| | Group B (Any Two) | | | | |
| | Software / Hardware Design | | | | |
| 1. | Design and Simulate dc-dc boost converter for battery-based applications | | | | |
| | Design a conventional dc-dc boost converter to step-up the battery voltage of 5 V to 10 V. Draw | | | | |
| | the circuit diagram and find required value of duty ratio. Implement the circuit in open-source | | | | |
| | TINA software. Plot the graphs of output voltage and PWM signal with respect to time. | | | | |

2. Design a web page(s)

- A. Using different text formatting tags
- B. With links to different pages and allow navigation between pages
- C. With Images, tables and frames
- D. Using style sheets to maintain uniform style for all web pages
- E. Using a form that uses all types of controls.
- F. Validate all the controls placed on the form using Java Script.

| | Note: Use maximum above points while designing Web page. |
|----|------------------------------------------------------------------------------------------------------|
| 3. | SMPS Design |
| | A. Design and Simulate of SMPS of 24 V @ 1A. OR |
| | B. Design, simulate and Implement buck converter using ICs like LM3842 / LM 3524 and |
| | measure performance parameters like |
| | 1. Load regulation |
| | 2. Line regulation |
| | 3. Ripple rejection |
| | 4. Output impedance and |
| | 5. Dropout voltage. |
| | 6. Note: Hardware based assignments: |
| | Note: EDA tool (NI Multisim/ORCAD/PSPICE / Altium Designer suite etc.) |
| 4. | Design and Simulate dc-dc boost converter for battery-based applications |
| | Design a conventional dc-dc boost converter to step-up the battery voltage of 5 V to 10 V. Draw |
| | the circuit diagram and find required value of duty ratio. Implement the circuit in open-source |
| | TINA software. Plot the graphs of output voltage and PWM signal with respect to time. |
| 5. | Design and Simulate PID Controller based on OP-AMP |
| | Design an analog PID controller to track a reference voltage of 5 V in a circuit. Draw the circuit |
| | diagram of the controller and implement the circuit in open-source TINA software. Change the |
| | reference voltage to 10 V and show that the circuit can still track this changed reference voltage. |
| | Show the effect of 3 controller gains viz. proportional gain, integral gain and derivative gain or |
| | the output response. |
| | Group C (Compulsory) |
| | Industrial Visit (Practical Visit) |
| 1. | Industrial visit to Maintenance /Calibration/ service department of Electronics |
| | industry/Hospitals/Service centers etc. Student Should visit to related field and submit report in a |
| | predefined format. |
| 2. | Industrial visit to software industry to understand the different processes and skills required as a |
| | software professional engineer |
| | |
| | |
| | |
| | |

Group D (Compulsory)

Documentation/Specification/Manual

1. Study of documentation/specification/Manual/SOP

Note: Based on group B assignment, student need to prepare user manual / SOP and make and effective presentation.

Third Year of E & Tc Engineering (2019 Course)

304191 (A): Mandatory Audit Course - 5

| Teaching Scheme: | Credit | Examination Scheme: | |
|------------------|--------|---------------------|--|
| | | | |

List of Courses to be opted (Any one) under Mandatory Audit Course 5

- Developing Soft skills and Personality
- Entrepreneurship and IP Strategy
- Urbanization and Environment
- Environmental & Resource Economics
- Environment and Development
- Globalization and Culture

GUIDELINES FOR CONDUCTION OF AUDIT COURSE

In addition to credits courses, it is mandatory that there should be audit course (non-credit course) from second year of Engineering. The student will be awarded grade as AP on successful completion of audit course. The student may opt for two of the audit courses (One in each semester). Such audit courses can help the student to get awareness of different issues which make impact on human lives and enhance their skill sets to improve their employability. List of audit courses offered in the semester is provided in the curriculum. Student can choose one of the audit course from list of courses mentioned. Evaluation of audit course will be done at institute level.

The student registered for audit course shall be awarded the grade AP and shall be included such grade in the Semester grade report for that course, provided student has the minimum attendance as prescribed by the Savitribai Phule Pune University and satisfactory insemester performance and secured a passing grade in that audit course. No grade points are associated with this 'AP' grade and performance in these courses is not accounted in the calculation of the performance indices SGPA and CGPA. Evaluation of audit course will be done at institute level itself.

Selecting an Audit Course:

Using NPTEL Platform:

NPTEL is an initiative by MHRD to enhance learning effectiveness in the field of technical education by developing curriculum based video courses and web based e-courses. The details of NPTEL courses are available on its official website www.nptel.ac.in

- Student can select any one of the courses mentioned above and has to register for the corresponding online course available on the NPTEL platform as an Audit course.
- Once the course is completed the student can appear for the examination as per the guidelines on the NPTEL portal.
- After clearing the examination successfully; student will be awarded with certificate.

Assessment of an Audit Course:

- The assessment of the course will be done at the institute level. The institute has to maintain the record of the various audit courses opted by the students. The audit course opted by the students could be interdisciplinary.
- During the course students will be submitting the online assignments. A copy of same students can submit as a part of term work for the corresponding Audit course.
- On the satisfactory submission of assignments, the institute can mark as "Present" and the student will be awarded the grade AP on the marksheet.

SEMESTER - VI

Third Year of E & Tc Engineering (2019 Course)

304192: Cellular Networks

| Teaching Scheme: | Credit | Examination Scheme: | |
|----------------------|--------|----------------------------|--|
| Theory: 03 hrs./week | 03 | In-Sem (Theory): 30 Marks | |
| | | End Sem (Theory): 70 Marks | |

Prerequisite Courses, if any:

1. Basic knowledge of - Probability, Random variables and Modulation.

Companion Course, if any: Cellular Networks Lab

Course Objectives: To make the students understand

- Various propagation Model and Estimation techniques of wireless communication system.
- OFDM and MIMO technologies to explain modern wireless systems.
- Various aspects of mobile communication system.
- Various aspects of wireless-system planning.
- Different Generation of Mobile Networks.
- Diversified issues that can enhance Network Performance.

Course Outcomes: On completion of the course, learner will be able to -

CO1: Understand fundamentals of wireless communications.

CO2: Discuss and study OFDM and MIMO concepts.

CO3: Elaborate fundamentals mobile communication.

CO4: Describes aspects of wireless system planning.

Outcomes for Unit II

CO5: Understand of modern and futuristic wireless networks architecture.

CO6: Summarize different issues in performance analysis.

| Coo. Summarize different issues in performance analysis. | | | | | | |
|------------------------------------------------------------------------------------------|-----------------------------------------------------------------|-------------------|--|--|--|--|
| | Course Contents | | | | | |
| Unit I | Introduction of Wireless Channel | (06 Hrs.) | | | | |
| Introduction, Free Space | Propagation Model, Ground-Reflection Scenario, Hata Model and | nd Receiver-Noise | | | | |
| Computation. Channel Est | imation techniques and Diversity in wireless communications. | | | | | |
| Mapping of Course | CO1: Understand fundamentals of wireless communications. | | | | | |
| Outcomes for Unit I | | | | | | |
| Unit II Orthogonal Frequency Division Multiplexing (06 Hrs. | | | | | | |
| Introduction, Motivation and Multicarrier basics, OFDM example, bit error rate for OFDM. | | | | | | |
| Multiple-Input Multiple-Output Wireless Communications: Introduction to MIMO Wireless | | | | | | |
| Communications, MIMO System Model and MIMO-OFDM. | | | | | | |
| Mapping of Course CO2: Discuss and study OFDM and MIMO concepts. | | | | | | |

| Unit III | Introduction to Mobile Communication | (08 Hrs.) | | |
|-----------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------|--|--|
| Introduction to Cellular | ntroduction to Cellular Service Progression, Cell Geometry, Overview of Cellular mobile and Network | | | |
| architecture, Cellular radio system design Frequency assignments, frequency reuse channels, Concept of cell | | | | |
| splitting and Cell sectoring. Significance of Handover in cellular systems with Handoff algorithms and roaming. | | | | |
| Mapping of Course Outcomes for Unit III | Outcomes for Unit | | | |
| | | | | |
| Unit IV | Wireless System Planning | (06 Hrs.) | | |
| Link-Budget Analysis, Tel | le-traffic Theory, Tele-traffic System Model and Steady State Analy | vsis. | | |
| Mapping of Course Outcomes for Unit IV | CO4: Describes aspects of wireless system planning. | U | | |
| Outcomes for Unit IV | | | | |
| T T *4 T 7 | XX70 1 13.47 1 0 1 1 0 1 1 1 0 1 1 1 0 1 1 1 0 1 1 1 0 1 1 1 0 1 1 1 1 0 1 1 1 1 0 1 1 1 1 0 1 1 1 1 0 1 1 1 1 0 1 1 1 1 0 1 1 1 1 0 1 1 1 1 0 1 1 1 1 0 1 1 1 1 0 1 1 1 1 0 1 1 1 1 0 1 1 1 1 0 1 1 1 1 0 1 1 1 1 0 1 1 1 1 0 1 1 1 1 0 1 1 1 1 0 1 1 1 1 0 1 1 1 1 0 1 1 1 1 0 1 1 1 1 0 1 1 1 1 0 1 1 1 1 0 1 1 1 1 0 1 1 1 1 0 1 1 1 1 0 1 1 1 1 0 1 1 1 1 0 1 1 1 1 0 1 1 1 1 0 1 1 1 1 0 1 1 1 1 0 1 1 1 1 0 1 1 1 1 0 1 1 1 1 0 1 1 1 1 0 1 1 1 1 0 1 1 1 1 0 1 1 1 1 0 1 1 1 1 0 1 1 1 1 0 1 1 1 1 0 1 1 1 1 0 1 1 1 1 0 1 1 1 1 0 1 1 1 1 0 1 1 1 1 0 1 1 1 1 0 1 1 1 1 0 1 1 1 1 0 1 1 1 1 0 1 1 1 1 0 1 1 1 1 0 1 1 1 1 0 1 1 1 1 0 1 1 1 1 0 1 1 1 1 0 1 1 1 1 0 1 1 1 1 0 1 1 1 1 0 1 1 1 1 0 1 1 1 1 0 1 1 1 1 0 1 1 1 1 0 1 1 1 1 0 1 1 1 1 0 1 1 1 1 0 1 1 1 1 0 1 1 1 1 0 1 1 1 1 0 1 1 1 1 0 1 1 1 1 0 1 1 1 1 0 1 1 1 1 0 1 1 1 1 0 1 1 1 1 0 1 1 1 1 0 1 1 1 1 0 1 1 1 1 0 1 1 1 1 0 1 1 1 1 0 1 1 1 1 0 1 1 1 1 0 1 1 1 1 0 1 1 1 1 0 1 1 1 1 0 1 1 1 1 0 1 1 1 1 0 1 1 1 0 1 1 1 1 0 1 1 1 1 0 1 1 1 1 0 1 1 1 1 0 1 1 1 1 0 1 1 1 1 0 1 1 1 1 0 1 1 1 1 0 1 1 1 1 0 1 1 1 1 0 1 1 1 1 0 1 1 1 1 0 1 1 1 0 1 1 1 1 0 1 1 1 1 0 1 1 1 1 0 1 1 1 1 0 1 1 1 1 0 1 1 1 1 0 1 1 1 1 0 1 1 1 1 0 1 1 1 1 0 1 1 1 1 0 1 1 1 1 0 1 1 1 1 0 1 1 1 0 1 1 1 1 0 1 1 1 1 0 1 1 1 1 0 1 1 1 1 0 1 1 1 1 0 1 1 1 1 0 1 1 1 1 0 1 1 1 1 0 1 1 1 1 0 1 1 1 1 0 1 1 1 1 0 1 1 1 1 0 1 1 1 1 0 1 1 1 1 0 1 1 1 1 0 1 1 1 1 0 1 1 1 1 0 1 1 1 1 0 1 1 1 1 0 1 1 1 1 0 1 1 1 1 0 1 1 1 1 0 1 1 1 1 1 0 1 1 1 1 1 0 1 1 1 1 0 1 1 1 1 1 0 1 1 1 1 1 0 1 1 1 1 1 0 1 1 1 1 1 0 1 1 1 1 1 0 1 1 1 1 1 0 1 1 1 1 1 0 1 1 1 1 1 0 1 1 1 1 1 0 1 1 1 1 1 0 1 1 1 1 0 1 1 1 1 1 0 1 1 1 1 1 0 1 1 1 1 1 0 1 1 1 1 1 0 1 1 1 1 1 0 1 1 1 1 1 0 1 1 1 1 1 0 1 1 1 1 1 0 1 1 1 1 1 0 1 1 1 1 1 0 1 1 1 1 1 0 1 1 1 1 1 0 1 1 1 1 1 0 1 1 1 1 1 0 1 1 1 1 1 0 1 1 1 1 1 0 1 1 1 1 1 0 1 1 1 1 1 1 0 1 1 1 1 1 0 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 | (0.C II) | | |

Third Year of E & Tc Engineering (2019 Course)

304193: Project Management

| Teaching Scheme: | Credit | Examination Scheme: | |
|------------------------|--------|------------------------------------------------------|--|
| Theory: 03 Hrs. / week | 03 | In-Sem (Theory): 30 Marks End Sem (Theory): 70 Marks | |

Prerequisite Courses, if any: NIL

Companion Course, if any: NIL

Course Objectives: To make the students understand

- The basics of project management and its life cycle
- The process of project identification, selection criteria of the project and how the project planning is undertaken.
- The organizational structure within a project and issues related to project management
- The techniques for effective project scheduling and resource considerations in project.
- The basics of effective handling the risks as well as managing finances within the project
- The complete product development process and requirements for entrepreneurship along with related legal issues.

Course Outcomes: On completion of the course, learner will be able to -

CO1: Apply the fundamental knowledge of project management for effectively handling the projects.

CO2: Identify and select the appropriate project based on feasibility study and undertake its effective planning.

CO3: Assimilate effectively within the organizational structure of project and handle project management related issues in an efficient manner.

CO4: Apply the project scheduling techniques to create a Project Schedule Plan and accordingly utilize the resources to meet the project deadline.

CO5: Identify and assess the project risks and manage finances in line with Project Financial Management Process.

CO6: Develop new products assessing their commercial viability and develop skillsets for becoming successful entrepreneurs while being fully aware of the legal issues related to Product development and Entrepreneurship.

| Course Contents | | | |
|-------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------|--|
| Unit I | Fundamentals of Project Management | (06 Hrs.) | |
| management, Need of Proj Manager (PM), Phases of Pro | ement: Definition of Project, The Project Life Cycle, Defined management, Project Management process and its import oject Management Life Cycle, Project Management Processes, Imals of Project Management Philosophy, Project Management Prince | ance, The Proje | |
| Mapping of Course Outcomes for Unit I | | for effectively | |
| Outcomes for Outcomes | handling the projects. | | |
| Unit II | Project Identification, Selection & Planning | (06 Hrs.) | |
| Project Identification and | Selection: Introduction, Project Identification Process, Proje | ct Initiation, Pr | |
| Feasibility Study, Feasibility | Studies, Project Break-even point. | | |
| Project Planning: Introduc | tion and need for Project Planning, Project Life Cycle, Roles, l | Responsibility a | |
| Team Work, Project Plannin | g Process, Work Breakdown Structure (WBS) | | |
| Mapping of Course | CO2: Identify and select the appropriate project based on fe | easibility study | |
| Outcomes for Unit II | and undertake its effective planning. | | |
| | | | |
| Unit III | Project Organizational structure & Issues | (07 Hrs.) | |
| Organizational Structure | and Organizational Issues: Introduction, Concept of Organization | zational Structur | |
| Roles and Responsibilities | of Project Leader, Relationship between Project Manager ar | nd Line Manage | |
| Leadership Styles for Project | ct Managers, Conflict Resolution, Team Management and Diver | sity Managemen | |
| Change management | | | |
| Mapping of Course | CO3: Assimilate effectively within the organizational struct | ure of project | |
| Outcomes for Unit III | and handle project management related issues in an ef | fficient manner | |
| Unit IV | Project Scheduling | (07 Hrs.) | |
| DEDT and CDM. Introduc | tion, Development of Project Network, Time Estimation, Det | ermination of t | |
| FERT and CFWI: Introduc | | | |
| | Measures of variability, CPM Model, Network Cost System | | |
| Critical Path, PERT Model, I | Measures of variability, CPM Model, Network Cost System n Projects: Introduction, Resource Allocation, Scheduling, Proje | ect Cost Estima | |

Link of the Course: https://nptel.ac.in/courses/110/107/110107081/

2. NPTEL Course on "Intellectual Property Rights and Competition Law" Link of the Course: https://nptel.ac.in/courses/110/105/110105139/

List of Tutorials to be carried out

| 1. | Understanding Impact of Delays in Project Completions with a company's case study. |
|----|--------------------------------------------------------------------------------------------------------------------------------------|
| 2. | Designing a Work Breakdown Structure (WBS) for any sample project. |
| 3. | Case study on Conflict Resolution and understanding its challenges. |
| 4. | Solve examples on Project scheduling using CPM and PERT Model. |
| 5. | Assignment on Risk Identification and Risk Analysis with a company's example and/or exploration of various project management tools. |
| 6. | Prepare a Business plan for an sample Product/ Service to be launched. |

Third Year of E & Tc Engineering (2019 Course)

304194: Power Devices & Circuits

| Teaching Scheme: | Credit | Examination Scheme: | |
|------------------------|---------------------------------|----------------------------|--|
| Theory: 03 hrs. / week | ek 03 In-Sem (Theory): 30 Marks | | |
| | | End Sem (Theory): 70 Marks | |

Prerequisite Courses, if any:

- 1. Basic Electrical Engineering
- 2. Basic Electronics Engineering
- 3. Electronic Circuits
- 4. Electrical Circuits

Companion Course, if any: Power Devices & Circuits Lab

Course Objectives:

- To introduce different power devices viz. SCR, GTO, MOSFET and IGBT with construction, characteristics, repetitive and non repetitive ratings and typical triggering/driver circuits.
- To understand working, design and performance analysis and applications of various power converter circuits such as ac to dc converters, inverter and chopper
- To know various protection circuit requirements of power electronic devices.

Course Outcomes: On completion of the course, learner will be able -

CO1: To differentiate based on the characteristic parameters among SCR, GTO, MOSFET & IGBT and identify suitability of the power device for certain applications and understand the significance of device ratings.

CO2: To design triggering / driver circuits for various power devices.

CO3: To evaluate and analyze various performance parameters of the different converters and its topologies.

CO4: To understand significance and design of various protections circuits for power devices.

CO5: To evaluate the performance of uninterruptible power supplies, switch mode power supplies and battery.

CO6: To understand case studies of power electronics in applications like electric vehicles, solar systems etc.

| Course Contents | | | | | |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------|--|--|--|

Third Year of E & Tc Engineering (2019 Course)

304195 (A): Digital Image Processing (Elective - II)

| Teaching Scheme: | Credit | Examination Scheme: |
|------------------------|--------|------------------------------------------------------|
| Theory: 03 hrs. / week | 03 | In-Sem (Theory): 30 Marks End Sem (Theory): 70 Marks |

Prerequisite Courses, if any:

Companion Course, if any: Digital Image Processing Lab

Course Objectives:

- To become familiar with digital image fundamentals.
- To get exposed to simple image enhancement techniques in Spatial and Frequency domain.
- To study the image segmentation and representation techniques.
- To become familiar with image compression methods.
- To learn concepts of degradation function and restoration techniques.
- To understand the Object Recognition.

Course Outcomes: On completion of the course, learner will be able to -

CO1: Apply knowledge of mathematics for image understanding and analysis.

CO2: Implement spatial domain image operations.

CO3: Design and realize various algorithms for image segmentation.

CO4: Design and realize various algorithms for image Compression.

CO5: Apply restoration to remove noise in the image.

CO6: Describe the object recognition system.

Course Contents Unit I DIP Fundamentals (08 Hrs.)

Fundamental steps of Image Processing, components of IP, Image formation, image sampling and quantization, image types, Image histogram Color Fundamentals, Color Models, pixel connectivity, Pseudo color image processing.

| Mapping of Course Outcomes for Unit I | CO1: Apply knowledge of mathematics for image understanding and analysis. | |
|------------------------------------------|---------------------------------------------------------------------------|-----------|
| Unit II | Image Enhancement in Spatial Domain | (07 Hrs.) |

Image enhancement in spatial domain, Basic gray level transformation, histogram processing, enhancement using arithmetic and logic operations, basic spatial filtering, smoothing and sharpening spatial filters, Intensity transformation, contrast stretching, histogram equalization.

| Mapping of Course | CO2: Implement spatial domain image operations. |
|-----------------------------|-------------------------------------------------|
| Outcomes for Unit II | |

| Unit III | Image Segmentation | (06 Hrs.) | | |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------|--|--|

Third Year of E & Tc Engineering (2019 Course)

304195 (B): Sensors in Automation (Elective -II)

| Teaching Scheme: | Credit | Examination Scheme: |
|----------------------|--------|----------------------------|
| Theory: 03 hrs./week | 03 | In-Sem (Theory): 30 Marks |
| | | End Sem (Theory): 70 Marks |

Prerequisite Courses, if any:

- 1. Basic Electrical Engineering
- 2. Basic Electronics Engineering

Companion Course, if any: Sensors in Automation Lab

Course Objectives: To make the students understand about:

- Concept of Sensors/Transducers and their Static and Dynamic Characteristics.
- Sensors used in Industry for Temperature and Humidity Measurement.
- Sensors used for Sensors used for Force, Pressure, Stress and Flow measurements.
- Sensors used for Displacement and Level Measurement.
- Applications of Image and Biosensors.
- Role of Sensors/Transducers in IoT applications.

Course Outcomes: On completion of the course, learner will be able to -

- **CO1:** Understand the Concepts of Sensors/Transducers, classify and evaluate static and Dynamic Characteristics of Measurement Systems.
- **CO2:** Choose the proper sensor comparing different standards and guidelines for measurements of Temperature and Humidity.
- CO3: Choose the proper sensor comparing different standards and guidelines for measurements of Force, Pressure, Stress and Flow
- CO4: Choose the proper sensor comparing different standards and guidelines for measurements of Displacement, Vibration, Acceleration and Level
- CO5: Explore sensors to profound areas like environmental, Agricultural and bio-medical equipment and sustainability.

CO6: Explore IoT based applications of Sensors and Transducers.

| Course Contents | | |
|-----------------|---------------------------------------|-----------|
| Unit I | Introduction to Sensors & Transducers | (06 Hrs.) |

Concept of Sensor, Concept of Transducer, Comparison between Sensors and Transducers, Role of Sensors in Automation, Broad Classification of Sensors and Transducers, Role of Transducer in measurement Systems, Block Diagram Measurement system, Study of Static and Dynamic Characteristics of Measurement Systems: Accuracy, Precision, Reproducibility, Linearity, repeatability, resolution, Sensitivity, Range, Span, Dead Zone, Hysteresis, Backlash, Dynamic Characteristics: Fidelity, Time response and frequency response, Classification of errors – Error analysis. Concept and Basic Principle of working of Resistive, Capacitive and Inductive sensors.

| Mapping of Course Outcomes for Unit I | CO1: Understand the concepts of Sensors / Transducers, classify and evaluate static and Dynamic Characteristics of Measurement Systems. | | |
|------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------|------------|--|
| Unit II | Sensors for Temperature | (06 Hrs.) | |
| Cintii | and Humidity Measurement | (00 1115.) | |

Temperature Measurement: Units of Temperature Measurement / Temp Measurement Scales; Celsius Scale, Fahrenheit Scale, Kelvin Scale, Rankine Scale-Unit Conversions Broad Classification of Temperature Transducers, RTD (e.g.PT-100), Thermocouple, Thermistors, Optical Fiber Sensors.

(Basic Principle of Working, Selection Criteria, Installation and Calibration, Signal Conditioning (e.g. Instrumentation Amplifier (with AD-620).

DC bridge: Wheatstone bridges, **AC Bridge:** Wein Bridge, Schering Bridge, Signal Conditioning: 2 Wire, 3-Wire and 4-Wire Compensation.

IR Temperature Sensor: MLX90614 ESF Non-Contact Human Body Infrared Temperature Measurement Module.

Smart temperature and solid state sensors: LM35, AD590 (Only for real time application/implementation in project based learning)

Humidity: Hygrometer, Soil Humidity Sensor, Soil Hygrometer (DHT11, TI HDC1050)

| Mapping of Course Outcomes for Unit II | | Choose the proper sensor comparing different standards and guidelines for measurements of Temperature and Humidity. | |
|-------------------------------------------|----------------------------------------------|---------------------------------------------------------------------------------------------------------------------|--|
| | | | |
| Unit III | Sensors for Force, Pressure, Stress and Flow | (06 Hrs.) | |

(Basic Principle of Working, Selection Criteria, Installation and Calibration, Signal Conditioning)

- Pressure scales: Newton, Bar, Pascal, PSI -Unit Conversions
- Absolute, Gauge and Vacuum Pressure

Classification of Pressure sensors: Strain gauge (Load Cell using Strain gauge), Piezoelectric

Transducer, Solid State Pressure Sensors (IC's like GY-63

MS5611-01BA03 to be discussed)

Differential Pressure Transducer flow measurement (only Mention of basic Principle of working, Bernoulli's theorem), Orifice, Venturi, Nozzle flow meter (only Descriptive), Pneumatic sensors (bellows, diaphragm), Ultrasonic and Hall effect Sensors for flow Measurement

Solid State Flow Sensors: YF-S201, E8FC-25D, Fiber-Optic Sensors.

| Mapping of Course | CO3: Choose the proper sensor comparing different standards and | |
|-------------------|-----------------------------------------------------------------|----------------|
| Outcomes for Unit | guidelines for measurements of Force, Pressure, St | ress and Flow. |
| Unit IV | Sensors for Displacement, Vibration, | (06 Hrs.) |
| | Acceleration and Level | |

(Basic Principle of Working, Selection Criteria, Installation and Calibration, Signal Conditioning)

Classification of Displacement Sensors: Potentiometer, Strain-gauged element, Capacitive element, Differential transformers, Eddy current proximity sensors, Inductive and Capacitive Proximity switch, Optical encoders.

Pneumatic sensors (**Bellows, Diaphragm**), Hall effect sensors, Accelerometer, Gyroscope and Magnetometer (**ADXL335/345**), Electro-Optical Sensors, Position Encoders.

| Mapping of Course | CO4: Choose the proper sensor comparing different standards and | |
|-----------------------------|-----------------------------------------------------------------|-----------|
| Outcomes for Unit IV | guidelines for measurements of Displacement, Vibration, | |
| | Acceleration and Level. | |
| | | |
| Unit V | Sensors in Environmental Studies, Bio Sensors | (06 Hrs.) |

Charge-Coupled and CMOS Image Sensors, Biosensors Resonant mirror, electrochemical, surface Plasmon resonance, Light addressable Potentio-Metric., Ph Measurement, CMOS MQ-2 Smoke LPG Butane Hydrogen Gas Sensor Detector Module (MQ-3 **Alcohol Detector** Gas Sensor Module MQ 135 Air Quality / Gas Detector Sensor Module for Arduino Data Sheet MLX90614 non-contact temperature sensor), Camera Sensor Ultrasonic proximity, Colour Sensors, Light Sensors Like Light Dependent Resistance(LDR), Photo Diode, Photo Transistors, RFID sensors, e.g. EM18 module, Applications RFID Sensors, MEMS and NEMS sensors.

| Mapping of Course CO5: Explore sensors to profound areas like environmental, | | |
|--------------------------------------------------------------------------------|---------------------------------------|-----------|
| Outcomes for Unit V Agricultural and bio-medical equipment and sustainability. | | |
| | | |
| . (| | |
| Unit VI | Latest trends in Sensors Applications | (07 Hrs.) |

Basic Concept of Data Acquisition Systems (Block Diagram Understanding), Basic Concept of IoT, Sensor Interface in IoT systems.

Case Study 1: IoT based Agriculture/Greenhouse systems.(Block Diagram)

(Mention of Optical Sensors, Electro-Chemical Sensors, Mechanical Sensors Dielectric Soil Moisture Sensors, Air Flow Sensors may be considered)

Case Study 2: IoT based Healthcare Systems.(Block Diagram)

(Mention of ECG Module, Temperature, Humidity, Accelerometer, Oxygen Level, Heart Rate sensors)

Case Study 3: IoT based Automobile Sector (Engine Management System)

(Mention of Fuel Level, Ignition, Exhaust Sensors)

| Mapping of Course | CO6: Explore IoT based applications of Sensors and Transducers. |
|-----------------------------|-----------------------------------------------------------------|
| Outcomes for Unit VI | |

Third Year of E & TC Engineering (2019 Course)

304195 (C): Advanced JAVA Programming (Elective - II)

| Teaching Scheme: | Credit | Examination Scheme: | |
|----------------------|--------|----------------------------|--|
| Theory: 03 hrs./week | 03 | In-Sem (Theory): 30 Marks | |
| | | End Sem (Theory): 70 Marks | |

Prerequisite Courses, if any:

1. Fundamentals of Java Programming

Companion Course, if any: Advanced JAVA Programming Lab

Course Objectives: Make the learner to:

- Design and develop GUI applications using Abstract Windowing Toolkit (AWT), Swing and Event Handling.
- Design and develop Web applications
- Designing Enterprise based applications by encapsulating an application's business logic.
- Designing applications using pre-built frameworks.

Course Outcomes: On completion of the course, learner will be able to –

CO1: Design and develop GUI applications using Applets.

CO2: Apply relevant AWT/ swing components to handle the given event.

CO3: Design and develop GUI applications using Abstract Windowing Toolkit (AWT), Swing and Event Handling.

CO4: Learn to access database through Java programs, using Java Database Connectivity (JDBC)

CO5: Invoke the remote methods in an application using Remote Method Invocation (RMI)

CO6: Develop program for client /server communication using Java Networking classes.

Course Contents

| Unit I | Applet | (06 Hrs.) |
|--------|--------|-----------|
| | | |

Applet Basics – Introduction, limitations of AWT, Applet architecture – HTML APPLET tag – Passing parameter to Appletget, DocumentBase() and getCodeBase(), Japplet: Icons and Labels Text Fields Buttons, Combo Boxes, Checkboxes, Tabbed Panes, Scroll Panes, Trees: Tables

| Mapping of Co | urse | CO1: Design and develop GUI applications using Applets. |
|----------------------------|------|---------------------------------------------------------|
| Outcomes for Unit 1 | I | |

Unit II Event Handling using AWT/Swing components (08 Hrs.)

Event Handling: Events, Event sources, Event classes, Event Listeners, Delegation event model, handling mouse and keyboard events, Adapter classes, inner classes. The AWT class hierarchy, user interface

components- labels, button, canvas, scrollbars, text components, checkbox, checkbox groups, choices, lists panels – scroll pane, dialogs, menu bar, graphics, layout manager – layout manager types – boarder, grid, flow, card and grib bag.

| Mapping of Course CO2: Apply relevant AWT/ swing components to handle the given event. | | | |
|----------------------------------------------------------------------------------------|-----------------|-----------|--|
| Outcomes for Unit II | | | |
| | | | |
| Unit III | GUI Programming | (06 Hrs.) | |

Designing Graphical User Interfaces in Java, Components and Containers, Basics of Components, Using Containers, Layout Managers, AWT Components, Adding a Menu to Window, Extending GUI Features Using Swing Components, Java Utilities (java.util Package) The Collection Framework: Collections of Objects, Collection Types, Sets, Sequence, Map, Understanding Hashing, and Use of Array List & Vector.

| | Unit IV | Database Programming using JDBC | (06 Hrs.) |
|-------------------------------------------------------------------------------|---------|----------------------------------|--------------|
| | | | |
| Outcomes for Unit III | | (AWT), Swing and Event Handling. | |
| Mapping of Course CO3: Design and develop GUI applications using Abstract Wir | | | wing Toolkit |

The Concept of JDBC, JDBC Driver Types & Architecture, JDBC Packages, A Brief Overview of the JDBC process, Database Connection, Connecting to non-conventional Databases Java Data Based Client/server, Basic JDBC program Concept, Statement, Result Set, Prepared Statement, Callable Statement, Executing SQL commands, Executing queries

| Unit V | Remote Method Invocation (RMI) | (06 Hrs.) |
|----------------------|------------------------------------------------------------|------------------|
| | 6.9 | |
| Outcomes for Unit IV | Connectivity (JDBC). | |
| Mapping of Course | CO4: Learn to access database through Java programs, using | ng Java Database |

Remote Method Invocation: Architecture, RMI registry, the RMI Programming Model; Interfaces and Implementations; Writing distributed application with RMI, Naming services, Naming and Directory Services, Setting up Remote Method Invocation – RMI with Applets, Remote Object Activation; The Roles of Client and Server, Simple Client/Server Application using RMI.

| Mapping of Course | CO5: Invoke the remote methods in an application using Remote Method |
|---------------------|----------------------------------------------------------------------|
| Outcomes for Unit V | Invocation (RMI) |

Unit VI Networking (08 Hrs.)

The java.net package, Connection oriented transmission – Stream Socket Class, creating a Socket to a remote host on a port (creating TCP client and server), Simple Socket Program Example.

InetAddress, Factory Methods, Instance Methods, Inet4Address and Inet6Address, TCP/IP Client Sockets. URL, URLConnection, HttpURLConnection, The URI Class, Cookies, TCP/IP Server Sockets, Datagrams, DatagramSocket, DatagramPacket, A Datagram Example.

Connecting to a Server, Implementing Servers, Sending EMail, Servlet overview – the Java web server – The Life Cycle of a Servlet, your first servlet.

Mapping of Course Outcomes for Unit VI

CO6: Develop program for client/server communication using Java Networking classes.

Third Year of E & TC Engineering (2019 Course)

304195 (D): Embedded Processors (Elective - II)

| Teaching Scheme: | Credit | Examination Scheme: | |
|----------------------|--------|----------------------------|--|
| Theory: 03 hrs./week | 03 | In-Sem (Theory): 30 Marks | |
| | | End Sem (Theory): 70 Marks | |

Prerequisite Courses, if any:

- 1. Digital Systems
- 2. Microcontrollers

Companion Course, if any: Embedded Processors Lab

Course Objectives:

- To make the students aware of the need of Embedded C and programming in Embedded C.
- To get the students acquainted with the need and applications of ARM Microprocessors in Embedded systems.
- To get insight of architecture and features of ARM 7 and ARM CORTEX M4 microcontroller.
- To enhance the capabilities of students to interface of various I/O devices, sensors and communication devices.

Course Outcomes: On completion of the course, learner will be able to -

CO1: Understand basics of Embedded C Programming and usage of Embedded C and study different software tools for programming microcontrollers.

CO2: Get acquainted with various Embedded Processor architectures related to industrial application.

CO3: Know about the programming of ARM 7 based microcontroller with on chip peripherals and external peripherals.

CO4: Understand the architectures of ARM Cortex M4 Microcontrollers and its advantages over ARM 7 Microcontrollers.

CO5: Implement the real world programming of ARM 7 based microcontroller with on chip peripherals and external peripherals.

CO6: Recognize the interfacing of real world sensors and standard buses. Will also able to design different case studies.

| Unit I Embedded Processor Fundamentals (06 Hrs.) Programming in Embedded C: Using C for Embedded C, data types, storage class, operators, Branching: i else-if, Looping: for, while, do-while. Embedded System Development Environment: IDE (Introduction) types of file generated on cros compilation, assembler, disassembler, Simulators and Debuggers. 2. NPTEL Course on "Embedded System Design with ARM", video course Link of the Course: https://nptel.ac.in/courses/106/105/106105193/

Third Year of E & Tc Engineering (2019 Course)

304195 (E): Network Security (Elective-II)

| Teaching Scheme: | Credit | Examination Scheme: |
|----------------------|--------|----------------------------|
| Theory: 03 hrs./week | 03 | In-Sem (Theory): 30 Marks |
| | | End Sem (Theory): 70 Marks |

Prerequisite Courses, if any:

Companion Course, if any:

Course Objectives: To introduce various network models, security threats and attacks and fundamentals of network security.

- To imbibe good foundation of network security in students for implementation of new network security algorithms.
- To understand different network models and the protocols used in each layer.
- To acquire detailed approach of encryption decryption for the data to transmit.
- To understand the role of network security as a tool for protection of different network entities.
- To be able to accurately apply security algorithms to real world security issues.
- To ensure windows and web browser security through implementation of various encryption standards.

Course Outcomes: On completion of the course, learner will be able to -

CO1: Analyze attacks on computers and computer security.

CO2: Demonstrate knowledge of cryptography techniques.

CO3: Illustrate various Symmetric and Asymmetric keys for Ciphers

CO4: Evaluate different Message Authentication Algorithms and Hash Functions

CO5: Get acquainted with various aspects of E-Mail Security

CO6: Assimilate various aspects of Web Security

| | Course Contents | |
|---------------------------------------------------------------------------------------------------------|-----------------------------------|-----------|
| Unit I | Attacks on Computers and Computer | (06 Hrs.) |
| | Security | |
| Introduction The good for accounity Converte angue of a Dringing of accounity Types of Converte attacks | | |

Introduction, The need for security, Security approaches, Principles of security, Types of Security attacks, Security services, Security Mechanisms, A model for Network Security

| Mapping of Course Outcomes for Unit I | CO1: Analyze attacks on computers and computer security. | |
|------------------------------------------|----------------------------------------------------------|-----------|
| Unit II | Cryptography-Concepts and Techniques | (06 Hrs.) |

Introduction, plain text and cipher text, substitution techniques, transposition techniques, encryption and decryption, symmetric and asymmetric key cryptography, stenography, key range and key size, possible types of attacks.

| Mapping of Course CO2: Demonstrate knowledge of cryptography techniques. Outcomes for Unit II | | | | | |
|----------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------|-------------------|--|--|--|
| | | | | | |
| Unit III | Symmetric and Asymmetric key for Ciphers | (08 Hrs.) | | | |
| Block Cipher principles & | Block Cipher principles & Algorithms (DES, AES, Blowfish), Differential and Linear Crypt analysis, Block | | | | |
| cipher modes of operati | on, Stream ciphers, RC4, Location and placement of encrypti | on function, Key | | | |
| distribution, Asymmetric | key Ciphers, Principles of public key crypto systems, Algorith | ms (RSA, Diffie- | | | |
| Hellman, ECC), Key Distr | ibution. | | | | |
| Mapping of Course Outcomes for Unit III | CO3: Illustrate various Symmetric and Asymmetric keys | for Ciphers, | | | |
| | | | | | |
| Unit IV | Message Authentication Algorithms and Hash Functions | (07 Hrs.) | | | |
| Authentication requirement | nts, Functions, Message authentication codes, Hash Functions, Secur | e hash algorithm, | | | |
| HMAC, CMAC, Digital | signatures, knapsack algorithm, Authentication Applications | such as Kerberos, | | | |
| X.509 Authentication Serv | vice, Public – Key Infrastructure, Biometric Authentication. | | | | |
| Mapping of Course Outcomes for Unit IV | CO4: Evaluate different Message Authentication Algorith Functions. | ıms and Hash | | | |
| | | | | | |
| Unit V | E-Mail Security | (06 Hrs.) | | | |

Third Year of E & Tc Engineering (2019 Course)

304197: Power Devices & Circuits Lab

| Teaching Scheme: | Credit | Examination Scheme: |
|---------------------------|--------|---------------------|
| Practical: 02 hrs. / week | 01 | Practical: 50 Marks |

Prerequisite Courses, if any:

- 1. Electrical Circuit Laboratory
- 2. Electronic Circuit Laboratory

| Companion | Companion Course, if any: Power Devices & Circuits | | |
|-----------|----------------------------------------------------------------------------------------------------------------------------|--|--|
| | List of Laboratory Experiments | | |
| | Group A (All Compulsary) | | |
| 1. | VI Characteristics of SCR i) Plot output V-I characteristics to measure I _H , I _L and voltage before | | |
| | and after breakdown, ii) Observe the effect of gate current on forward break down iii) gate | | |
| | characteristics iv) compare with datasheet specifications | | |
| 2. | V-I Characteristics of Power MOSFET i) Plot output characteristics and calculate output | | |
| | resistance ii) Plot transfer characteristics and measure threshold voltage iii) compare with | | |
| | datasheet specifications | | |
| 3. | V-I Characteristics of IGBT i) Plot output characteristics and calculate output resistance ii) Plot | | |
| | transfer characteristics and measure threshold voltage iii) compare with datasheet specifications | | |
| | Group B (Any 2) | | |
| 6. | Single phase Full Converter using IGBT / SCR with R & R-L load i) Observe load voltage | | |
| | waveform, ii) Measurement of average o/p voltage across loads, iii) Verification of theoretical | | |
| | values with practically measured values. | | |
| 8. | Single-Phase PWM Power MOSFET / IGBT based bridge inverter for R and motor load i) | | |
| | Observe output voltage waveforms and measure set of rms output voltage for varying pulse width | | |
| | and variable input dc voltage for R and motor load, ii) compare measured output voltages with the | | |
| | theoretical findings | | |
| 9. | Step down / Step up chopper using power MOSFET / IGBT i) Measure duty cycle and observer | | |
| | effect on average load voltage for DC chopper | | |
| | Group C (Any 4) | | |
| 11. | SMPS /UPS Performance Evaluation i) find load & line regulation characteristics for no load | | |
| | condition and at 500 mA & 1A load ii) compare the performance with supplier specifications | | |
| 12. | Single phase AC voltage controller using IGBT/SCR for R and RL load | | |
| | i) Observe output rms voltage waveforms, ii) Measurement output voltage across load, | | |
| | iii) Verification of theoretical values with practically measured values. Or Simulation of the Single | | |
| | phase AC voltage controller using Powersim / any open source circuit simulation software | | |
| | | | |

| 13. | To study speed control of DC / single phase AC motor |
|-----|--------------------------------------------------------------------------|
| 14. | To design and implement a solar cell operated emergency lighting system. |
| 15. | To study battery testing, safety and maintenance of batteries |
| | isit to solar power generation plant is recommended |
| | NOuestion Raipers. com. |

Third Year of E & Tc Engineering (2019 Course)

304198 (A): Digital Image Processing Lab (Elective - II)

| Teaching Scheme: | Credit | Examination Scheme: |
|---------------------------|--------|---------------------|
| Practical: 02 hrs. / week | 01 | Practical: 25 Marks |

Prerequisite Courses, if any: -

Companion Course, if any: Digital Image Processing

NOTE:

1.Use the MATLAB / SCILAB / Open CV.

2. For Group A recommended not to use inbuilt functions

| | List of Laboratory Experiments | | |
|-----|---------------------------------------------------------------------------------------------|--|--|
| | Group A (All Compulsory) | | |
| 1. | Introduction to Image Processing Toolbox/ CVIP tools (MATLAB/SCILAB/Open CV) | | |
| 2. | Perform the following basic operations on image | | |
| | a. Obtain Negative image | | |
| | b. Obtain Flip image | | |
| 3. | (a) Implement Gray level slicing (intensity level slicing) in to read cameraman image. | | |
| | (b) Read an 8 bit image and to see the effect of each bit on the image. | | |
| | (c) Read an image and to extract 8 different planes i.e. 'bit plane slicing." | | |
| 4. | Implement various Smoothing spatial filter. | | |
| 5. | Perform the following basic operations on image: | | |
| | a. Point Detection b. Line Detection | | |
| | c. Edge Detection d. Thresholding | | |
| 6 | Implement and study the effect of Different Mask (Sobel, Prewitt and Roberts) | | |
| | Group B (Any Two) | | |
| 7. | Implement region based segmentation. | | |
| 8. | Implement Image compression using DCT Transform. | | |
| 9. | Implement various noise models and their Histogram. | | |
| 10. | Read an image, plot its histogram then do histogram equalization. Comment about the result. | | |

| | Group C (Any One) | |
|-----|----------------------------------------------------------------------------|--|
| 11. | Implement inverse filter and wiener filter over image and comment on them. | |
| 12. | Implement Huffman coding algorithm for image compression. | |
| 14. | Implement wiener filter over image and comment on them. | |
| | | |

Third Year of E & Tc Engineering (2019 Course)

304198 (B): Sensors in Automation Lab (Elective - II)

| Teaching Scheme: | Credit | Examination Scheme: |
|---------------------------|--------|---------------------|
| Practical: 02 hrs. / week | 01 | Practical: 25 Marks |

Prerequisite Courses, if any: -

- 1. Basic Electronics Engineering
- 2. Basic Electrical Engineering

Companion Course, if any: Sensors in Automation

List of Laboratory Experiments Group A (Any Five) 1. Temperature Measurement using appropriate sensor (Thermocouple/RTD). 2. Weight Measurement using Load Cell. 3. Liquid Level using Capacitive Sensor.

NOTE: Observe and plot Input/ Output characteristics, Hysteresis, and Sensitivity in above experiments.

| | 4. | Position control using Servomechanism using photoelectric pickups. | | | |
|---|-------------------|------------------------------------------------------------------------------------------------|--|--|--|
| ľ | 5. | Moisture Measurement using appropriate Sensor and plot its static characteristics. | | | |
| | Group B (Any Two) | | | | |
| | 6. | To measure speed of a rotating shaft using appropriate sensor, plot the measurement | | | |
| | | characteristics. | | | |
| | 7. | 7. R - Color Sensing using appropriate sensor. | | | |
| | 8. | To measure acceleration and orientation (x,y,z axis) using MEMS gyro/accelerometer sensor such | | | |
| | as ADXL335. | | | | |
| | 9. | Simulate the performance of chemical sensor (PH). | | | |
| | Group C (Any Two) | | | | |
| | 10. | Acquisition of Minimum 2 Sensor Data using a Data Acquisition Systems | | | |
| | 11. | Temperature Measurement using IR Detector | | | |
| | 12. | Heart rate measurement using appropriate sensor | | | |
| | 13. | Simulate the performance of Biosensor | | | |

Third Year of E & Tc Engineering (2019 Course)

304199: Internship

| Teaching Scheme: | Credit | Examination Scheme: |
|------------------|--------|----------------------|
| ** | 04 | Term Work: 100 Marks |

Course Objective:

- Will expose technical students to the industrial environment, which cannot be simulated in the classroom and hence creating competent professionals for the industry.
- Provide possible opportunities to learn, understand and sharpen the real time technical/managerial skills required at the job.
- Exposure to the current technological developments relevant to the subject area of training.
- Experience gained from the 'Internship' will be used in classroom discussions.
- Create conditions conducive to quest for knowledge and its applicability on the job.
- Learn to apply the Technical knowledge in real industrial situations.
- Gain experience in writing Technical reports/projects.
- Expose students to the engineer's responsibilities and ethics.
- Familiarize with various materials, processes, products and their applications along with relevant aspects of quality control.
- Promote academic, professional and/or personal development.
- Expose the students to future employers.
- Understand the social, economic and administrative considerations that influence the working environment of industrial organizations.
- Understand the psychology of the workers and their habits, attitudes and approach to problem solving.

Course Outcomes: On completion of the internship, learner will be able to –

CO1: To develop professional competence through internship.

CO2: To apply academic knowledge in a personal and professional environment.

CO3: To build the professional network and expose students to future employees.

CO4: Apply professional and societal ethics in their day to day life.

CO5: To become a responsible professional having social, economic and administrative considerations.

CO6: To make own career goals and personal aspirations.

Internships are educational and career development opportunities, providing practical experience in a field or discipline. Internships are far more important as the employers are looking for employees who are properly skilled and having awareness about industry environment,

practices and culture. Internship is structured, short-term, supervised training often focused around particular tasks or projects with defined time scales.

Core objective is to expose technical students to the industrial environment, which cannot be simulated/experienced in the classroom and hence creating competent professionals in the industry and to understand the social, economic and administrative considerations that influence the working environment of industrial organizations.

Engineering internships are intended to provide students with an opportunity to apply theoretical knowledge from academics to the realities of the field work/training. The following guidelines are proposed to give academic credit for the internship undergone as a part of the Third Year Engineering curriculum.

A. Duration:

Internship to be completed after semester 5 and before commencement of semester 6 of at least 4 to 6 weeks; and it is to be assessed and evaluated in semester 6.

B. Framework of Internship:

- ✓ Students are required to be involved in Inter/Intra Institutional Activities viz; Training with higher Institutions.
- ✓ Soft skill training organized by Training and Placement Cell of the respective institutions; contribution at incubation/innovation/entrepreneurship cell of the institute; participation in conferences/ workshops/ competitions etc.
- ✓ Learning at Departmental Lab/ Tinkering Lab/ Institutional workshop.
- ✓ During the vacation after 5th semester, students are ready for industrial experience. Therefore, they may choose to undergo Internship / Innovation / Entrepreneurship related activities.
- ✓ Students may choose either to work on innovation or entrepreneurial activities resulting in start-up or undergo internship with industry/ NGO's/ Government organizations/ Micro/ Small/Medium enterprises to make themselves ready for the industry.
- ✓ Every student is required to prepare a file containing documentary proofs of the activities done by him. The evaluation of these activities will be done by Programmed Head / Cell Incharge / Project Head / TPO / faculty mentor or Industry Supervisor.

C. Internship Guidelines:

a) Guidelines to the Institute:

Department will arrange internship for students in industries / organization after fifth semester or as per AICTE/ affiliating University guidelines & managing internships. The general procedure for arranging internship is given below:

Step 1: Request Letter/ Email should go to industry to allot various slots of 4-6 weeks as internship periods for the students. Students request letter/profile/interest areas may be submitted to industries for their willingness for providing the training.

Step 2: Industry will confirm the training slots and the number of seats allocated for internships via Confirmation Letter/ Email. In case the students arrange the training themselves the confirmation letter will be submitted by the students.

Step 3: Students on joining Training at the concerned Industry / Organization, submit the Joining Report/ Letters / Email.

Step 4: Students undergo industrial training at the concerned Industry / Organization. In-between Faculty Member(s) evaluate(s) the performance of students once/twice by visiting the Industry/Organization and Evaluation Report of the students is submitted in department.

Step 5: Students will submit training report after completion of internship.

Step 6: Training Certificate to be obtained from industry.

Step 7: List of students who have completed their internship successfully will be issued by Training and Placement Cell.

b) Guidelines to the students:

Any absenteeism by students during their internship should be informed immediately to the mentor/reporting manager and the internal guide. No special considerations will be accepted. Students cannot take leave for college work or fest activities. The leave permission for any college related activities will be solely approved by the HOD. The monthly attendance format should be duly submitted to the internal guide by the intern.

c) Internal reporting Guidelines:

Every intern should send weekly report to their internal guide without fail. It is mandatory for the intern to send weekly reports to their respective guide on regular basis. Interns should have at least fortnightly verbal communication with the internal guide without fail. In cases where in the company wants to secure their confidential information in the project / internship report, the internal guide should duly co-ordinate with the respective mentor/reporting manager on the method of reporting to assure that no information will be leaked outside and is purely for academic purposes.

d) Internship Diary / Internship Workbook:

Students must maintain Internship Diary/ Internship Workbook. The main purpose of maintaining diary/workbook is to cultivate the habit of documenting. The students should record in the daily training diary account of the observations, impressions, information gathered and

suggestions given, if any. The training diary/workbook should be signed after every day by the supervisor/ in charge of the section where the student has been working.

Internship Diary/workbook and Internship Report should be submitted by the students along with attendance record and an evaluation sheet duly signed and stamped by the industry to the Institute immediately after the completion of the training. Internship Diary / workbook may be evaluated on the basis of the following criteria:

- Proper and timely documented entries.
- Adequacy & quality of information recorded
- Data recorded.
- Thought process and recording techniques used.
- Organization of the information.

e) Internship Work Evaluation:

Every student is required to prepare a maintain documentary proofs of the activities done by him / her as internship diary or as workbook. The evaluation of these activities will be done by Programme Head/ Cell In-charge / Project Head / faculty mentor or Industry Supervisor based on-overall compilation of internship activities, sub-activities, the level of achievement expected, evidence needed to assign the points and the duration for certain activities.

Assessment and Evaluation is to be done in consultation with internship supervisor (Internal and External - a supervisor from place of internship).

f) Evaluation through Seminar presentation / Viva-voce at the institute:

The student will give a seminar based on his training report, before an expert committee constituted by the concerned department as per norms of the institute. The evaluation will be based on the following criteria:

- ✓ Depth of knowledge and skills Communication & Presentation Skills.
- ✓ Team Work
- ✓ Creativity
- ✓ Planning & Organizational skills
- ✓ Adaptability and Analytical Skills
- ✓ Attitude & behavior at work.
- ✓ Societal Understanding
- ✓ Ethics
- ✓ Regularity and punctuality
- ✓ Attendance record
- ✓ Log book
- ✓ Student's Feedback from External Internship Supervisor

g) Internship Report:

The report shall be presented covering following recommended fields but limited to:

- ➤ Title/Cover Page
- > Internship completion certificate.
- ➤ Internship Place Details- Company background-organization and activities/Scope and object of the study / personal observation.
- ➤ Index/Table of Contents
- > Introduction
- ➤ Title/Problem statement/objectives
- ➤ Motivation/Scope and rationale of the study
- ➤ Methodological details
- Results / Analysis /inferences and conclusion
- > Suggestions / Recommendations for improvement to industry, if any
- > Attendance Record
- List of reference (Library books, magazines and other sources)

h) Feedback from internship supervisor (External and Internal):

Post internship, faculty coordinator should collect feedback about student with following recommended parameters:

- ✓ Technical knowledge
- ✓ Discipline
- ✓ Punctuality
- ✓ Commitment
- ✓ Willingness to do the work
- ✓ Communication skill
- ✓ Individual work
- ✓ Team work
- ✓ Leadership

Third Year of E & Tc Engineering (2019 Course)

304200: Mini Project

| Teaching Scheme: | Credit | Examination Scheme: |
|---------------------------|--------|---------------------|
| Practical: 04 hrs. / week | 02 | Term Work: 25 Marks |
| | | Oral: 50 Marks |

Course Objectives:

- To understand the —Product Development Process" including budgeting through Mini Project.
- To plan for various activities of the project and distribute the work amongst team members.
- To inculcate electronic hardware implementation skills by -
- Learning PCB artwork design using an appropriate EDA tool.
- Imbibing good soldering and effective trouble-shooting practices.
- Following correct grounding and shielding practices.
- To develop student's abilities to transmit technical information clearly and test the same by delivery of Seminar based on the Mini Project.
- To understand the importance of document design by compiling Technical Report on the Mini Project work carried out.

Course Outcome:

On completion of the course, student will be able to

CO1: Understand, plan and execute a Mini Project with team.

CO2: Implement electronic hardware by learning PCB artwork design, soldering techniques, testing and troubleshooting etc.

CO3: Prepare a technical report based on the Mini project.

CO 4: Deliver technical seminar based on the Mini Project work carried out.

A) Execution of Mini Project

- Project group shall consist of **not more than 3** students per group.
- Mini Project Work should be carried out in the Design / Projects Laboratory.

- Project designs ideas can be necessarily adapted from recent issues of electronic design magazines Application notes from well known device manufacturers may also be referred.
 - Use of Hardware devices/components is mandatory.
 - Layout versus schematic verification is mandatory.
 - Bare board test report shall be generated.
 - Assembly of components and enclosure design is mandatory.

B: Selection: Domains for projects may be from the following, but not limited to:

- Instrumentation and Control Systems
- Electronic Communication Systems
- Biomedical Electronics
- Power Electronics
- Audio, Video Systems
- Embedded Systems
- Mechatronic Systems
- Microcontroller based projects should preferably use Microchip PIC controllers / ATmega controller / AVR microcontrollers / Ardino / Rasberry Pi.
- **C.** Monitoring: (for students and teachers both): Suggested Plan for various activities to be monitored by the teacher.
- Week 1 & 2: Formation of groups, Finalization of Mini project & Distribution of work.
- Week 3 & 4: PCB artwork design using an appropriate EDA tool, Simulation.
- Week 5 to 8: PCB manufacturing through vendor/at lab, Hardware assembly, programming (if required) Testing, Enclosure Design, Fabrication etc
- Week 9 & 10: Testing of final product, Preparation, Checking & Correcting of the Draft Copy of Report

Week 11 & 12: Demonstration and Group presentations.

Log book for all these activities shall be maintained and shall be produced at the time of examination.

D. Report writing: A project report with following contents shall be prepared:

- > Title
- > Specifications
- ➤ Block Diagram
- > Circuit Diagram
- > Selection of components, calculations
- > Simulation Results
- > PCB Art work
- > Testing Procedures
- ➤ Enclosure Design
- > Test Results & Conclusion
- > References

Third Year of E & Tc Engineering (2019 Course)

304191 (B): Mandatory Audit Course - 6

| Teaching Scheme: | Credit | Examination Scheme: |
|------------------|--------|---------------------|
| | | |

<u>List of Courses to be opted (Any one) under Mandatory Audit Course 6</u>

- Patent Law for Engineers and Scientists
- English language for competitive exams
- Energy Resources, Economics and Environment
- Principles of Human Resource Management
- Six Sigma
- Non-Conventional Energy Resources

GUIDELINES FOR CONDUCTION OF AUDIT COURSE

In addition to credits courses, it is mandatory that there should be audit course (non-credit course) from second year of Engineering. The student will be awarded grade as AP on successful completion of audit course. The student may opt for two of the audit courses (One in each semester). Such audit courses can help the student to get awareness of different issues which make impact on human lives and enhance their skill sets to improve their employability. List of audit courses offered in the semester is provided in the curriculum. Student can choose one of the audit course from list of courses mentioned. Evaluation of audit course will be done at institute level.

The student registered for audit course shall be awarded the grade AP and shall be included such grade in the Semester grade report for that course, provided student has the minimum attendance as prescribed by the Savitribai Phule Pune University and satisfactory insemester performance and secured a passing grade in that audit course. No grade points are associated with this 'AP' grade and performance in these courses is not accounted in the

calculation of the performance indices SGPA and CGPA. Evaluation of audit course will be done at institute level itself.

Selecting an Audit Course:

Using NPTEL Platform:

NPTEL is an initiative by MHRD to enhance learning effectiveness in the field of technical education by developing curriculum based video courses and web based e-courses. The details of NPTEL courses are available on its official website www.nptel.ac.in

- Student can select any one of the courses mentioned above and has to register for the corresponding online course available on the NPTEL platform as an Audit course.
- Once the course is completed the student can appear for the examination as per the guidelines on the NPTEL portal.
- After clearing the examination successfully; student will be awarded with certificate.

Assessment of an Audit Course:

- The assessment of the course will be done at the institute level. The institute has to maintain the record of the various audit courses opted by the students. The audit course opted by the students could be interdisciplinary.
- During the course students will be submitting the online assignments. A copy of same students can submit as a part of term work for the corresponding Audit course.
- On the satisfactory submission of assignments, the institute can mark as "Present" and the student will be awarded the grade AP on the marksheet.
